BARN BURNT

Last Wednesday evening, about five o'clock, a fire call was sent into the town Hall, when the alarm was promptly sounded. The local fire brigade expeditiously responded, and learned that the large barn on the farm of Geo. Bolster, convenient to town, was on fire. When the brigade arrived on the scene it was found that the fire had made so much headway that it was impossible to save it from ruin, and the barn became a total loss.

There had been some cattle and horses in the barn when the fire was first noticed by Mr. Bolster's little girl, and these were got out in time. He was enabled to save a quantity of oats, and some harness. About 20 collars were lost in the flames.

Mr. Bolster had all his green feed stored in the loft of the barn, and it is thought this became heated, causing spontaneous combustion. Otherwise Mr. Bolster is at a loss to account for the fire. The barn was only partly insured.

VICTOR NEWS

Born, to Mr. and Mrs. George Ing, on March 12, a son.

Mark Daley is now employed as travelling salesman for the North American Oil Co.

Necessity Local held its annual meeting on March 9, and the new officers are as follows:—President, George Morrison; Vice President, Frank McNeer; Secretary, Harry Hawthorne. The local is sponsoring a picture show at Victor school on March 23rd. The meeting to be held on that evening will take the form of a social evening.

Interest Shown in Better Seed Campaign

Farmers throughout the province and organizations interested in the improvement of agricultural conditions are taking a keen interest in the campaign directed by the Department of Agriculture to encourage the use of high quality seed grain for Alberta's 1929 crop. A number of radio addresses will be given from Edmonton, Red Deer, Calgary and Lethbridge during the week while 10,000 posters and 50,000 leaflets are being distributed to farmers in all sections of the province. A marked improvement was noted in the quality of seed sown in 1928 and it is expected that this improvement will be still further increased as a result of the attention which is being paid to this important factor in crop production at the present time.

Health Service of the Canadian Medical Association

A SCOTTISH INVESTIGATION

For the past few years, the Board of Health of Scotland has been carrying on an investigation in regard to the nutrition of school children. In the schools of seven centres selected for the study, the children were divided into groups. The objective was to ascertain whether or not the children who received a daily ration of milk would show an improvement in health greater than those who did not receive the milk, or those who received a biscuit only.

The result was that the children receiving milk were, after a time, found to be twenty per cent heavier and taller than those not receiving milk. There was, in other words, a decided improvement in growth. The general health of many of the milk ration group was noticeably better. This improvement was not temporary, for they have continued to improve while the milk ration was maintained during a second period of investigation.

This is not the only investigation of the kind that has been made. Other studies of similar nature, in many countries, have shown that during the growing years, milk, as an article of diet, is essential. The need and value of milk cannot be too strongly emphasized, because we have no substitute for it.

The practical lesson for parents and those in charge of children is to see to it that their children are not being handicapped through the lack of milk in the diet. Milk is not a complete diet for school children, but no diet is complete without milk.

Milk may be used in many ways. It is not necessary that it be drunk. It may be taken on cereals and other foods; it may be used in cocoa, in milk puddings or in any other similar manner. It need hardly be said that safe, pure milk only should be used, and that means milk from healthy cows, produced in a cleanly manner and then pasteurized.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Weekly Editors Plan Visit to Peace River

A trip through the Peace River country is planned by the editors of Alberta Weekly newspapers, following the annual convention of the Alberta division of the Canadian Weekly Newspapers' Association which will be held in Edmonton during the month of August.

OBITUARY

LEWIS LEROY SPEELMAN

Another old-time pioneer of this district, Lewis Le Roy Speelman, died on Tuesday, March 12, at the Royal Alexander Hospital, Edmonton, from pneumonia. The remains were shipped to Delia on Wednesday for burial in the family plot.

Mr. Speelman was born in Ohio, and was 66 years of age. His wife predeceased him about three years ago. The deceased gentleman was a pioneer of this district, and was at one time manager of the local yard for the Crown Lumber Company. We once heard him say that it was he who drove the first stake when Delia first was started to become a town. He had been in failing health for some time, and was living here during the greater part of last summer, when he went to reside at Edmonton. Afflicted with a weak heart, he was unable to withstand the disease, as above stated, and his demise was somewhat sudden, and came as a shock to all who knew him. Much sympathy is felt for the bereaved family.

The surviving members of the family are Mrs. J. A. Rummel, of Winsor, Ont.; Mrs. A. L. Brown, Edmonton; Harve Speelman, of Innisfail; and Roy Speelman, of Delia. He has a brother, F. M. Speelman, who resides at Pittsburg, Pennsylvania.

The funeral service was held in Delia United Church at 3.00 o'clock on Thursday afternoon, thence to Delia Cemetery. Rev. G. A. Steele officiated. The pall bearers were—Messrs. A. Dawson, W. Sinclair, F. Faulkiner, J. J. Bradford, P. Thompson, and A. Morrison.

Floral tributes were sent by the following:—From the family, Audrey and Ruth, Mr. and Mrs. L. Howarth, Mr. and Mrs. Cougle, Drumheller; Mr. and Mrs. Zaharia, Mr. National Fruit Co., Calgary; the Ritchie family, Mecheche; Mr. and Mrs. Faulkiner and Otta, Mr. and Mrs. W. Sinclair, Mr. and Mrs. A. Dawson, Mr. and Mrs. J. J. Bradford, Mr. and Mrs. F. J. Dawson, Mr. and Mrs. F. C. McCully.

The Delia choir were in attendance at the church, Mrs. A. S. Newcombe presiding at the piano.

Winter Bros., funeral directors of Drumheller, had charge of the funeral arrangements.

Correspondence

Ar While we are at all times willing to publish letters of public interest from correspondents, we do not bind ourselves to the opinions expressed therein.

To Editor of "The Delia Times."

Many changes have taken place in our midst during the past fifteen years,—progressive changes with the times. Only last week the election of Lambton Municipality (Ward 2) were granted the privilege to record their votes for Councillor for the first time in the Village of Delia, a change greatly appreciated by a majority of the voters in Ward 2.

RATEPAYER.

Cards of Thanks

Mr. and Mrs. E. R. Tillotson wish to thank the U.F.W.A. for the lovely flowers sent Mrs. Tillotson, while a patient in the Craigmyle Hospital; also the many friends who called. This was very much appreciated.

Mr. and Mrs. Geo. Bolster and family desire to thank their numerous friends and neighbors for the kind assistance and help in time of need, which was very much appreciated.

Mere words cannot express our deep appreciation and thanks we wish to convey to all our friends and neighbors for the sympathy and kindnesses shown us during the long illness and passing of our dear father. We especially wish to thank Mr. and Mrs. Newcombe and choir, and those who sent flowers.

MR. & MRS. J. A. RUMMEL
MR. & MRS. A. L. BROWN
MR. & MRS. H. C. SPEELMAN
MR. & MRS. L. E. SPEELMAN

The Delia Rest Room Committee wish, to thank the Majestic and Forrel Lake Women's Institute, the Delia Village Council, and Mr. S. Schatz for their generous donations to the Rest Room funds.

Craigmyle News

Mr. and Mrs. Thomas Davey celebrated their Silver Wedding Anniversary on Saturday 16th inst., and were the recipients of the congratulations and good wishes of their many friends. On Friday evening they entertained their friends in Larson Hall, in the form of a whist party and dance. During the evening Capt. N. J. MacCrimmon expressed the good wishes of the community for the future happiness and prosperity of their hosts, and on behalf of the community D. G. Innes presented Mr. and Mrs. Davey with a silver tea service; and Mrs. Davey also received a bouquet of beautiful roses from the local U.F.W.A. A very nice lunch was served, and a most enjoyable evening was spent by the large gathering.

G. H. Ross went to Calgary on Tuesday morning's train on business.

Constable Pat Vernon, of the A.P.P., was a visitor in town on Saturday last, and as a result of their protracted delay in getting license plates for their cars quite a number of owners had to pay a visit to Hanna on Monday. Probably in the long run severity is just as much appreciated as leniency, as the latter will only be taken advantage of and be expected to continue indefinitely.

Frank E. Farrow, whose farm adjoins town, and who is now living at Prince George, B. C., where he is engaged in learning mechanical dentistry, was in town and while here held an auction sale of his farm machinery, horses, etc. He left again on Tuesday morning's train for his home at Prince George.

We regret to announce the death at the age of 2½ years, of Frederick Wentworth Jinks, son of Mr. and Mrs. Herbert E. Jinks, of this district, which occurred at Hanna Hospital on Saturday evening last, from pneumonia. The funeral was held in the United Church here on Monday afternoon, and was conducted by Rev. W. Jackson Archer, of the Anglican Church, after which interment was made in Craigmyle cemetery. The sympatny of the community is extended to Mr. and Mrs. Jinks in their bereavement.

Mr. and Mrs. Rudolf Shanders, of Lawsonburg, have been receiving congratulations on the birth of twin daughters at Craigmyle Hospital on Wednesday, 6th inst., and we are pleased to state that mother and babies are all doing well.

Sentinel Hill Items

Mr. H. Limpert has returned from a two months' visit at the coast. "Dad" is more enthusiastic than ever about Alberta. Mrs. Limpert will be returning home soon.

Mr. and Mrs. A. Carson have returned from a visit to Calgary.

Miss Stone, our teacher, will have a pupil teacher from Normal school under her supervision during the week beginning March 25th.

Illness is quite prevalent among our residents. This week Mrs. V. J. Simpson and Mr. G. R. Howard are convalescent after an attack of flu, while master Ivan Long is ill with mumps.

Spring like weather has caused the farmers to hasten their preparations for seeding, and preparing the seed is the order of the day.

Mr. E. Foster of Dowling spent last week end with his parents here.

Per Capita Wealth High in Alberta

Alberta stands second among the provinces of the Dominion in its per capita national wealth, according to figures just issued by the Dominion Bureau of Statistics. As regards the provincial distribution of wealth, Ontario ranks first with an estimated agricultural wealth of $9,130,189,000 and Quebec second with an estimated wealth of $6,658,108,000. British Columbia holds first place with a per capita wealth of $3,844; Alberta second with $3,608; Saskatchewan third with $3,559, and Manitoba fourth with $2,957. These figures may be compared with $2,902 for Ontario; $2,598 for Quebec and $2,842 the per capita wealth for the whole Dominion.

Tractor Power Farming Is Profit Farming

You can do your farm work, with a McCormick-Deering Tractor and McCormick-Deering Tractor Machinery, for less money and with a great deal more comfort, than you can with horses.

PLOWS

The new McCormick-Deering Tractor Plows are built of steel. Where malleable castings were formerly used, pressed steel plates are now used instead.

The frogs are made of pressed steel, and the mouldboards are guaranteed to scour where it is possible for a mouldboard to scour.

DRILLS

Numerous tests have proven that grain planted with a McCormick-Deering Front Seed Delivery Drill will yield more bushels to the acre, and produce an evener grade of grain.

Buy your Farm Implements from us. We will give you quality and service.

The Evil Of Grain Mixing

Following the unsatisfactory result of grading the 1923 wheat crop of Western Canada, a veritable deluge or protest and complaint has poured in to Dominion and Provincial Governments, Wheat Pools, Grain Commission, Grain Exchange, and all farmer organizations. Merchants and business men generally, suffering because the farmers have suffered, add their protests. All this would be unnecessary, perhaps no one feature has called forth more vigorous objection than has the practice of mixing.

It is quite true that everybody does not see eye to eye on this subject, and farmers themselves are sharply divided on the issue whether or not mixing should be prohibited and made an offence under the law. While many favor such a policy, others hold the opinion that if mixing was entirely disallowed there would be a terrible glut of low grade and no grade grain on the market, with resulting enormous loss to producers.

The Saskatchewan Grain Inquiry Commission has gathered within its own province a mass of evidence on this and allied subjects affecting the grading and marketing of Western grain, and proposes to carry its investigations further afield in Manitoba, Alberta, British Columbia, and Europe, in what is recognized as the most determined attempt yet made to find solutions to some of the acute problems confronting the Western grain grower. In due time the report and recommendations of that Commission will be laid before the legislative authorities.

There is, however, another form of mixing in regard to which there are no two opinions. It is unanimously denounced as an evil, and one that is costing farmers of Western Canada many millions of dollars annually. Furthermore, control in the case of this particular form of mixing rests, not with Governments or Wheat Pools, or Grain Commissions, but with the individual grain grower.

The form of mixing to which reference is made is that indulged in by so many farmers of sowing seed of mixed varieties. Instead of sowing only pure seed of one good variety, the seed too frequently used is a mixture of different kinds, sometimes mixed with noxious weeds, with consequent loss in value of the crop harvested. Thus the original mixing takes place, not in country or terminal elevators, not on board ship, not in the world markets, but right on the farms of Western Canada.

Investigations over a number of years have established the fact that certain varieties are best adapted to certain districts. This information is available to every farmer. It is his for the asking from his nearest Experimental Farm. He should secure this information before he sows the variety which grows best in his district. He may not be able to afford to purchase sufficient pure, registered seed of that particular variety to seed his entire acreage this year, but he should get a few bushels of such pure, registered seed, sow it in a prepared plot, and thus increase his seed supply on his own farm.

The frosts of last Fall make it necessary that all seed sown this spring be first tested for its germinating qualities. Germination test is necessary in wheat, oats, barley and flax. Strong plants having healthy vigorous roots withstand adverse conditions such as spring frosts, insects, disease, better than weak plants. Farmers will be well advised, therefore, to send samples of their seed grain to their nearest Dominion Seed Laboratory and have it tested.

There is still another form of mixing on the farm which is even more disastrous than is the mixing of seed. We refer to the mixing through the use of impure and not properly cleaned seed. Governments and railways combine to run special seed cleaning machinery demonstration trains through the country. Governments build seed cleaning plants. Nevertheless, tons of seed weeds are sown annually, as well as seed grain of poor grade. What was definitely proven by the seed drill survey conducted in Saskatchewan a couple of years ago.

Western Canada farmers must begin at the beginning in dealing with this mixing evil. First, it is essential that all seed sown be of one good variety, thoroughly cleaned, with all weed seeds eliminated, and tested to demonstrate its germinating qualities. With the groundwork thus laid for the best possible grain, increased profits will result to the grower, and he should be taken to preserve the identity, grade and standard of that grain all the way from the farm to the ultimate world market.

Chinese Population In Canada

Number Of Chinese Entered In Dominion Given As 50,300

According to reports tabled in the House of Commons, three Chinese immigrants are admitted to Canada during the year 1927-28, two of them whom were women. Two students coming to attend Canadian universities were also non-immigrants. Eleven Chinese were deported during the year.

The registration carried on during 1923-24 showed a Chinese population of Canada of approximately 55,706. Of this number, 48,305 were males, 2,102 females, and 6,099 children under 16 years of age. Of the total British Columbia had 31,116 Chinese residents.

The number of Japanese entering Canada in 1927 was 511, and in 1928 to Sept. 30, 507 adult females, and 216 children under 16 years of age.

Echoes From Space

Light on the wandering of wireless waves through the ether is claimed by Professor Eccleston, of Oslo, to have been thrown by experiments undertaken in conjunction by Norwegian and British wireless experts. The echoes of states that echoes from those waves have been clearly distinguished. He puts forward the view that they are thrown back from the earth when they reach a point in space far beyond the moon.

Reduce Aviation Expenditures

British Government Decides To Lessen Appropriation For This Year

British estimates for government aviation expenditures during 1929, presented to the House of Commons by Sir Samuel Hoar, air secretary, total $81,000,000. This is a decrease of about $250,000.

In connection with the estimates, Sir Samuel said the new airships, the R-100 and the R-101, should be completed early in the financial year.

The two airships should begin the trials in the spring and I hope to see the flights to overseas bases, such as Montreal and Karachi, achieved during the year," Sir Samuel added.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from paring corns or using harsh liquid or plaster corn relief comes from using PUTNAM'S CORN EXTRACTOR. It afflicted with corns, callouses or sore footwear use PUTNAM'S—It's painless, and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Alberta Dairy Products

Exceeded In Value Twenty Million Dollars For 1928 Season

Alberta's dairy products for 1928 exceeded in value $20,000,000, which represented 8.3 per cent. of total agricultural production, Dr. C. P. Marker, dairy commissioner, told delegates at the recent dairymen's convention in Edmonton. There was a substantial increase in the price paid of cream supplied by producers and in the quality of creamery produced, he declared.

SPARKLING EYES AND ROSY CHEEKS

The Birthright Of Every Girl With Rich, Red Blood In Her Veins

The dull eye that goes with bloodlessness is a sure sign of misery and weakness. Anaemic—that is blood-less—girls and women have dull, heavy eyes with dark lines underneath. But this is not all. Anaemia is the primary cause of the sallow complexion, the pimply skin, the sunken cheeks and lustreless hair. Anaemic girls grow painfully weak and irritable; they are often dizzy and incapable of much exertion, while older women who are anaemic complain of being "never really well."

There is only way to bring brightness, beauty and health to pale, weak girls and women. That way is to make new, rich blood in the body—rich, healthy blood that imparts strength and restores the bright eye and rosy lips of perfect health. That Dr. Williams' Pink Pills make new, rich blood and bring health and strength has been proved in thousands of cases. One such case is that of Miss Margaret Waite, Parry Sound, Ont., who says:—"I was attending high school and as examinations were coming on I was working hard, and began to feel easily tired and often had severe headaches. My mother I set to a meal I felt that I did not want to eat. I went to bed at night but got little rest. A doctor I took his medicine, but made little progress. Then my aunt, who had great faith in Dr. Williams' Pink Pills got me a supply and I began taking them. I soon noticed that my appetite was improving, then headaches became less frequent and that I was not so easily tired. I went away to camp for my holidays, taking the pills with me and taking them regularly. The result was that I returned home a healthy girl, my weight increased, my cheeks took on the natural glow and pain had vanished. I strongly recommend every weak girl to try Dr. Williams' Pink Pills a fair trial."

If your dealer does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Salt Well

Drilling Operations At Waterways Meets With Success

According to a report tabled in the Alberta Legislature, successful operations have been carried out at Waterways in connection with salt drilling. The work was started in 1927, but it was not until October 22nd, 1928, that the salt formation was encountered, at a depth of 670 feet, and the presence of a body of salt 213 feet thick was encountered. The analysis of the brine solution showed that the salt was 99 per cent. pure.

Rub It In For Lame Back.—Brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment rubs in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Church Army's New Western Hostel

The Church Army, an organization with which the Canadian Pacific Railways Colonization Department co-operates in placing boys on farms in Western Canada, announces the completion of its new hostel in Calgary, from which its work can more effectively be carried on.

All the big nations have agreed not to go to war, so they are now building warships to give the sailors a ride.

Area Under Pasture

The total acreage under pasture in Canada in 1928, was 9,528,045 acres.

Start Construction Of Ocean "Landing Field"

First Floating Airport To Be Anchored Half Way Between New York and Bermuda

Construction of the first floating airport of several that have been planned for trans-Atlantic passenger service will be begun immediately, according to an announcement by Henry J. Gielow, Inc., naval architect. It is to be anchored about 1,500 miles at sea, half way between New York and Bermuda.

The airport will be a steel platform, 1,200 feet long, 400 feet wide and riding normally at least 100 feet above the surface of the ocean. It is to be moored by cables to three men and will contain a machine shop, hotel and restaurant, and radio beacons for guiding aircraft.

To hold this floating island in place there will be chains 21,350 feet long attached to specially designed sea anchors. Six thousand tons of steel and 2,000 tons of iron will go into its construction and its cost is estimated at $1,000,000. Only a few concern has been retained as consulting engineers by the builders, the Armstrong Seadrome Development Company, of Newark, Del.

It is understood that Mr. Armstrong expects the island to be in place by next Spring. Experimental flights then will be made between the mainland and Bermuda, using the seadrome as a stopping place. It has been suggested that successful the construction of other floats for trans-Atlantic service will be pushed as quickly as possible.

The Armstrong company already has conducted tests with large Sikorsky amphibians on areas similar to those of the seadrome. Experimental flights then will be made between the mainland and Bermuda, using the seadrome as a stopping place. It has been suggested that successful the construction of other floats for trans-Atlantic service will be pushed as quickly as possible.

Kaiser Cost Germany Millions Every Year

Abdication Has Saved Country Large Sum In Salaries

It has been figured that Germany in the last 10 years has saved $125,000,000 by the abdication of the former royal rulers of the empire. Before the war the kaiser cost Germany $5,264,000 a year. Then came three crown princes, the Duke of Wurtemburg—and seven grand dukes, who cost Germany more than $5,000,000 more. Besides these "fixed appointments" the other expenses of the imperial system brought the annual expenditures to $15,000,000. Of course there had to be big armies and generally increased cost of royal show under the royal government prevailed. Further cost could hardly be estimated.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a dessertful of Dr. Thomas' Eclectric Oil. Add a little sugar to it and gargle thoroughly. It will allay the irritation and prevent the ulceration. Gargling will not are painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

France Needs Wheat

France wants 4,000,000 tons of foreign wheat to meet the present year's need, says a communication received from Paris by the Argentine Ministry of Agriculture. The dispatch adds that owing to the scarcity of concentrated forage livestock farmers were using wheat to feed.

Dairying In Okanagan District

The North Okanagan District is turning increasingly to the dairy industry with profitable results. Cream cheques totalling $250,000, were paid out during the past year.

Great Britain produced 252,000,000 tons of coal in 1927.

BILIOUSNESS RELIEVED . . . QUICKLY

CARTER'S LITTLE LIVER PILLS

This Pure Vegetable Pill quickly starts the bile flowing, gently relieves the bowels,—the poisons pass away, the sour and acid stomach sweetens, and biliousness vanishes. Sick Headache, Indigestion, Bad Breath and Complexion improve by the gentle action of these tiny vegetable laxative pills. All Druggists 25c and 75c red pkgs.

CARTER'S LITTLE LIVER PILLS

Propose Second Arctic Trip

Aviators Anxious To Reach Europe By Greenland Route

A letter has been received in Cochrane, Ontario, from Bert Hassells and his partner, Crammer, stating that it is their intention to make another attempt this year to establish an aerial mail route from Chicago to Stockholm, Sweden, via Greenland. These are from Rockford, Ill., fliers who made an unsuccessful attempt to reach Europe by a northern route last year, the attempt ending when they were forced to make a landing at Greenland. This year, according to the fliers they will attempt the trip in 500-mile relays, with refuelling stations at Sault Ste. Marie, Cochrane and two located at intervals between Cochrane and Greenland. They have asked that the runway which they made use of last year in taking off from Cochrane be kept open in preparation for a start this spring.

PARENTS UNDERSTOOD THIS BABY'S LANGUAGE

"We thought we were going to lose our baby, teething," says a Kentucky mother. "Our baby couldn't keep anything and was getting thinner every day. After one of his fretful, crying nights I thought of Castoria and got some. A few drops made him comfortable, and after a few doses he seemed like a different baby." Doctors everywhere recommend purely vegetable, harmless Fletcher's Castoria for colds, constipation, colic and diarrhoea of babies and children. Over millions of mothers know its gentle influence is best. Avoid imitations. The Fletcher signature is the mark of genuine Castoria.

British Harvesters Anxious To Return

1,500 Men Who Returned To England, Now Anxious To Come To Canada

W. C. Osmond, official observer of the British harvesters returning to the British Government, who has been in Canada for some months, has returned to the old land. At a banquet given in his honor at Winnipeg, Mr. Osmond announced that information he had received from the Imperial Government was that more than 1,500 of the British harvesters who had returned from Canada, were anxious to get back again, hoping to come out again to this country to become settled. A plan is now announced in Britain for assisting these men to return, having already qualify for a low fare by undergoing a four weeks' course in clearing land and handling stock. Many of these harvesters who stayed in Canada for a reasonable length of time will be accepted.

Recipes For This Week

(By Betty Barclay)

ORANGE BREAD

1 yeast cake.
¼ cup lukewarm water.
1 egg.
1 tablespoon melted butter.
1 tablespoon melted lard.
1 teaspoon salt.
2 tablespoons sugar.
Grated rind 2 oranges.
¾ cup orange juice.
2 cups flour.

Dissolve yeast in warm water; add egg well beaten, butter, lard, salt, sugar, grated orange rind, orange juice, and flour. Beat until smooth, cover and let rise. When necessary knead until smooth and elastic; let rise till double its bulk; shape in double loaf; put in greased pan, let rise again to double its bulk, and bake one hour in a moderate oven. This bread is delicious with orange marmalade for afternoon tea.

CARROT PUDDING

1½ cups flour.
1 cup brown sugar.
1 cup grated carrots.
1 cup grated potatoes.
1 cup raisins.
1 cup currants.
1 cup finely chopped suet.
1 teaspoon soda.
1 teaspoon nutmeg.
A little nutmeg.

Dredge fruit with some of the flour and scald soda before adding. Mix well and steam three hours.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the streets, from flowers, from grain and various other irritants may set up a condition impossible to irradicate except through the persistent treatment of Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatics suffering from this scourge of the bronchial tubes. It is sold everywhere.

Westerners Win Debate

The Western Canada Universities debating team, supporting the affirmative of the resolution "That this house is opposed to all forms of censorship," was given the decision over debaters from Dalhousie University, at Halifax, recently.

A cast off railroad locomotive with its wheels removed, heats a Norwich, Connecticut passenger station. It performs efficiently, supplying heat to the train shed, station and cars in the yard as required.

Minard's Liniment for the Grippe and Flu.

Where Canadians Have Advantage

Broadening Influence Living Under Inspiration Of British Traditions and Close To Great Republic

Home United States college men, crossing the Atlantic some years ago with the writer of this article, said that they could "never get a laugh out of Punch." The writer replied that as a Canadian he had an advantage over them, because every week he was able to enjoy the good things in both Punch and Life,—in other words because he possessed the capacity for appreciating both the English and the American types of humor.

It follows that there must be something broadening in the circumstance that Canadians live under the inspiration of British traditions, and are at the same time next door neighbors to the people of the great Republic. The sentiment may be averse of presumptuous sin, against which the Psalmist prayed that he might be kept, but on the other hand it gives the Canadian Parliament would possess too keen a sense of humor to pass one after the other in rapid succession the Kellogg Peace Pact, abolishing war as an instrument of national policy, and the Cruiser Bill, providing for the immediate expenditure of $274,000,000, for sixteen powerful new warships.—Ottawa Journal.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

A recent overcrowding census taken in Hackney, London, England, disclosed one case of nine persons living in one room, while 25,860 lived more than two in a room.

National Wealth Of Canada

Estimated By Government Official To Be Around Forty Billions

The national wealth of Canada was estimated before the war to amount of five billion dollars. Today according to a Government official, it is around forty billions.

Consider this:

There are several concerns in Canada whose values are hovering around the billion dollar mark; the C.P.R., International Nickel Company, Royal Bank, Bank of Montreal, Consolidated Smelters, and Canadian National Railways.

This country hasn't begun yet to really develop its resources. We are the fifth commercial nation on earth, and the communities which are getting most out of our growth are those which believe in Canada.

Travelling Libraries

During the year 1928, books to the number of 59,499, in 1,338 travelling libraries, were sent by the Saskatchewan Government to rural districts and small villages throughout the province. The average circulation of each book was 10. The expenditure to maintain this service was $22,000.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Better To Keep Busy

Brooding over trouble is like surrounding oneself with a fog; it magnifies all objects seen through it. Occupation of the mind prevents this. Any hard work, manual work or even the mind solving matters of concern, and also tires the body so as to ensure sleep.

NICE WORDS WON'T DYE a dress or coat...

Neither pretty pictures nor colorful adjectives will dye a thing. It takes real dyes to do the work; dyes made from true aniline.

Next time you have dyeing to do, try Diamond Dyes. See how easy it is to get them. *Diamond Dyes are true.* Your dealer will refund your money if you do not agree they are better dyes.

You get none of that re-dyed look from Diamond Dyes; no streaking or spotting. Just fresh, crisp, bright new color. And watch the way they keep their brilliance through wear and washing. They are better dyes because they are *Easy to use. Perfect results* are the *long life features of the package* of special dye, for silk or wool only. With it you can dye your valuable cotton or silk or wool with results equal to the finest professional work. Remember this when you buy. The *blue package* dye is silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Largest Single Item In The Dominion's National Wealth Is That Of Agriculture

The aggregate national wealth of Canada for the year 1926, was $36,691,482,000, says a report issued by the Dominion Bureau of Statistics. This figure is exclusive of undeveloped natural resources. Similar estimates placed the total wealth for 1925, at $26,673,174,000, and for 1921, at $32,185,000,000, "though these figures are not exactly comparable in view of certain improvements and additions made in the method of estimation," the report points out. The figures, however, can be taken to indicate an increase of about $909,000,000 for the twelve months under review over the previous like period, and approaching an advance of $3,-500,000,000 in the five years 1921-26, the report continues.

The largest single item in the Dominion's national wealth for 1926, was that for agriculture, which reached a total of $7,817,718,000, or 29.28 per cent. of the entire amount. This figure includes the figures for agricultural production for the year.

The second largest element was urban real property, which reached a figure of $7,081,375,000; the tangible value of the forests was $4,-$60,613,000.

As regards the provincial distribution of wealth, Ontario ranked first, with estimated aggregate wealth of $9,130,189,000, or 34.2 per cent. of the total, and Quebec, second, with estimated wealth of $6,656,108,000. The western provinces came first in per capita wealth, however; British Columbia held first rank with a per-capita wealth of $3,844; Alberta second, with $3,647; Saskatchewan, third, with $3,539; and Manitoba fourth, with $2,957. These figures may be compared with $2,902 and $2,308, the per capita wealth of Ontario and Quebec, respectively, and $2,842, the per capita wealth for the whole Dominion.

By provinces, the estimated wealth was:

Prince Edward Island, $145,745,-000; Nova Scotia, $535,748,000; New Brunswick, $723,592,000; Quebec, $6,656,108,000; Ontario, $9,130,189,-000; Manitoba, $1,589,906,000; Saskatchewan, $2,920,739,000; Alberta, $2,192,067,000; British Columbia, $2,185,210,000; Yukon, $12,473,000.

Just Ordinary Business

Certified Cheque For Large Amount Nothing To Office Boy

Engineering a very special matter of business involving the handing over of a hundred thousand dollars, a lawyer decided that a certified cheque would be as satisfactory as actual cash, and safer. He therefore drew up cheque to this amount made payable to "Bearer." He took it to the bank and spent most of an hour with an official arranging for the safe delivery of the paper to his office, for, as soon as the bank certifies a cheque to "Bearer" it is cashable by anybody, anywhere. He arranged that the cheque was to be sent by a clerk, accompanied by an armed guard. The gentleman, escorted by the precautions mapped out, went to lunch. When he returned to his desk the office boy looked up. "A couple of fellows brought a note here for a hundred grand for you a while ago," he announced. "I put it in the basket with the rest of the incoming stuff."

Object Had Vanished

The class had been told to bring things to school for drawing lesson, and just as the lesson was about to begin, a small boy was found standing tearfully at his teacher's desk.

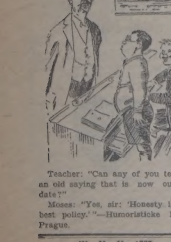
"I've swallowed my object," he explained.

"What was it?" asked the teacher anxiously.

"A banana," replied the would-be artist.

Astronomer (to his wife): "My dear, congratulate me. I've discovered a star of hitherto unheard-of density, and I'm going to name it after you."

Products produced from the forests of Canada have an annual value of about $475,000,000, of which approximately $450,000,000 is distributed for labour, equipment and supplies.



Teacher: "Can any of you tell me an old saying that is now out of date?"

Moses: "Yes, sir: 'Honesty is the best policy.'"—Humoristicke Listy, Prague.

W. N. U. 1777

Range Investigations

To Determine Cattle For Depletion Of Pasture Crops

Range lands pastured on from year to year apparently suffer by a depletion of certain of the valuable plants. A survey of many ranges in Southern Saskatchewan and Alberta, by officials of the Department of Agriculture, at Ottawa, revealed acute shortage of pasture crop. Many of the ranchers were forced to purchase hay, and the shortage of feed was felt most during winter months and more than 90 per cent of the stock men found it necessary to cultivate some of their land for the growing of forage crops to supplement the native forage. Realizing that nothing should be done to place the ranching industry on a more permanent and secure basis, the forage and field husbandry divisions of the experimental farms have undertaken a programme of work that gives promises of very useful results. An experimental ranch, fairly representative of the large range area, has been established near the town of Manyberries, in Southeastern Alberta. In his report for 1927, published by the Department of Agriculture, Ottawa, Dr. G. Stewart, Dominion agrostologist, announces that it is intended to put into practice different grazing systems, including that known as deferred and rotation grazing. The grazing practices regarded as most desirable are those that combine maximum utilization with maintenance of a vigorous vegetative cover of the climax types. The work is of a fundamental nature, very beneficial results are expected from the range projects that are being undertaken.

Mistreating the Heart

Few People Pay Attention To Warning Sig Of Trouble

Take care of your heart. You have only one. You give it a huge amount of work to do and it does it without complaint. But when it protests, then it is time! It does rebel and tells you, pay attention to the warnings.

These are some of the evidences of a weakening heart: You are short of breath on exertion that had not previously produced distress. You notice that your shoes are tight in the evenings, but that you have no difficulty in putting them on the next morning. Then one day you take cold; the next day you are short of breath, you have a distressed cough and your feet are swollen. By soon as the symptoms are relieved the average person wants to get up rather than to go about slowly and gradually getting back to his usual activity. It would not be unmitigated bad fortune for a person with a bad heart to have a broken leg or so.

Fertilizing the Strawberry Bed

Fertilizers Should Be Applied In the Fall For Best Results

While fertilizing the strawberry bed in the spring does increase the size of the fruit it does not increase the number of fruit buds in the plants. Investigations carried on by W. H. Davis and R. Hig, both of the horticultural division of the experimental farms, leads to the conclusion that to increase the fruit buds, fertilizing of the patch requires to be done in the fall of the year. An account of the work published in Bulletin No. 110, of the Department of Agriculture, at Ottawa, shows that the highest yields of fruit were obtained when the fertilizer was applied on September 15th, of the first year, and of August 15th, of the first fruiting year. These dates, it was learned, are quite close to the beginning of fruit bud differentiation as determined by microscopical studies carried on with the young plans.

Maintenance Of Roads

Much Time and Attention Devoted To Protection Of Roadways

Well-constructed highways are necessary in Canada to meet the demands of traffic, but well-maintained roads are even of more importance in the interest of economy. Consequently the provincial administrative organs and engineers are devoting a great deal of thought and attention to the care and protection of roads. In 1927 the mileage of roads under maintenance in Canada under the patrol or gang system was 44,416 miles, at a cost of $16,024,617.

U.S. Destroyers To Visit B.C.

The United States Government proposes to send six destroyers to visit British Columbia ports during the summer of 1929. Three of these vessels will be at Victoria, and three at Vancouver from July 11 to July 15. Announcement to this effect was made by Hon. J. L. Ralston, minister of national defence.

Where Bogs Are Bogs.

The Irish bogs are almost as great in extent as those of Germany. While the latter are from 9 feet to 20 feet deep, the Irish variety often reaches 40 feet. It has been calculated that each acre of bog contains 18,331 tons of peatstuff.

Some Of Earliest Toys Were Horrible

Worst Type Made In Germany In Eighteenth Century

Toys of a very early date are rare; the earliest known mechanical toy is Egyptian, dating back to about 2,000 B.C. It is a cradle little figure with jointed arms and legs, which kneads dough on a sloping board when a string is pulled. This is the oldest known example of a form of toy which in all ages has been the delight of children.

The most horrible type of toy was one made in Germany as late as the 18th century. It consisted of a comic figure inside which a real bird was confined. The bird's desperate struggles made the figure move as though it had been alive.

Another grim toy was a dreadfully realistic guillotine, out of date of the French revolution, 3ft. 7in. high, with which it was possible to behead aristocratic dolls.

Charlie Chaplin took one of these guillotine toys for his son August. The poet's mother replied:

"Hang it, you'll be bringing infamous implement of murder—that I will not do at any price. If I had authority the maker should be put in the stocks and the world have the machine publicly burnt."

An interesting Egyptian toy is a wooden crocodile with movable jaws, dating back to 1,100 B.C. It has quite respectable teeth.

The more modern times one of the quaintest toys reproduced is a wooden effigy of William Teil, who shoots the apple off his son's head by hitting a wooden apple on a wooden boy's son stands. This is as recent as the beginning of the 19th century.

Noah's Ark, curiously enough, appears among the toys, presumably because all the old ones have perished. It is a type of plaything which has been popular with children for centuries, and it is not likely to be displaced in favor by the latest theories that Noah was a myth and the Ark an impossibility.

Among illustrations given of dolls' houses and the like, many are extraordinarily elaborate and costly. One ordered by Peter the Great, for example, exceeded in cost the price of £2,000 for which he had stipulated, and he refused to take it.

Chinese Make Farm Implements From Trees

Branched Sticks From Willows Make Excellent Pitchforks

Strange as it may seem, pitchforks, from trees, according to P. H. Dorsett, who has been exploring in China in the hope of finding plants suitable for introduction by the Department of Agriculture into the United States.

Near a village about fifty miles southeast of Peiping, he found groves of willows are grown for the special purpose of making farm implements. A few of the shoots from each are allowed to grow to a height of six or eight feet, at which they usually produce branches on opposite sides. The lower portion of the main shoot, from what is roughly a three-tined form or trident.

"The making of these branched sticks into harvest forks," says Mr. Dorsett, "is a more or less simple operation. The bark is stripped from the main shoot branches.

"After the forks have been steamed for an hour or two the branches can be bent without breaking. The forks are placed in a rough forming frame and the branches are spaced to form the tines and to give them the proper curve. The tines are held in the frame about six weeks, then they are dried and stored. When they are wanted for market, the tines are sharpened and the handles smoothed for use."

Rush For Homesteads

Hundreds Of Homesteads Taken Up In Three Prairie Provinces This Year

From the point of view of new homesteads taken up, the year 1929 has got off to a good start January saw 761 homesteads filed upon, as compared with 467 for the same month last year—an increase, roughly, of two-thirds in the present year, as against the last with 50, as compared with 201 for January, 1928; Saskatchewan followed with 309 as against 194; Manitoba with 94 as against 74. Of the total, all British Columbia last with 24 against 13.

C.N.E. Prizes Won By Alberta Men

Prizes of $50 each are awarded each year by the Department of Agriculture of the C.N.E. to the two men from Western Canada winning the highest awards in timothy seed and alsifa seed at the International Grain Show held at Chicago. The latest prizes last fall were won by Albert Lougheed, of Bowden, Alta., champion in timothy seed, and by A. J. Stephens, of Bow River, Alta., champion in alfalfa seed.

Kilted Americans

Americans who insist on wearing the kilts while visiting Scotland are becoming such a common sight that the people pay little attention to it. In the past some of the costumes of the visitors have been so loud that true Caledonians shuddered, but apparently they are becoming accustomed to the way foreigners use the plaid.

Indian Wedding

The ancient marriage rites of the Stoney People were exemplified when Chief Bear Paw and his maiden bride, Miss Sylvia Hendaien-Cutie, of Hilversum, Holland, to Mr. Louis Lantzius, of Vancouver. Immediately after the picturesque Indian ceremony which took place on the Bow River at Banff, the couple were again married according to the rites of their own church. Bear Paw is seen placing the eagle feathers, emblem of faithfulness, on the groom's head and bracelet on the wrist of the bride.

Prefers Rural Life

Ontario Man Says Farmer Is His Own Boss

In a letter written to the Farmer's Advocate, "Digit," of Perth County, Ontario disagrees with an assertion that those who live on the farm do so because they cannot tear themselves away and are willing to lose money on the farm rather than drive a hundred a week in the city. He says: "I know of several offices in the city where I am welcome to go on the pay roll at any time. I have tasted some of the joys of city life and at a good salary. I came back to the farm for two reasons: First, I could make more money and have more left when the year was up; and, second, there is not the worry and incessant demand of attention to business on the farm. As to the $700 a week, I met a couple of men who received that amount. I met a hundred who were competent and successful farmers, but had gone to the city, and only three or four were getting over $30 per week; they could have done as well had they stayed on the farm. Foolishly, we forget what it costs to live in the city."

New Canadians Are Eager To Learn

How new Canadians immigrants from foreign countries, are determined to learn the English language and Canadian ways, is shown by the progress made in a night school organized for Ukrainian settlers at Walburg, Sask., This school meets three nights a week, and on one night recently, though the weather was cold, twenty were in attendance, some having come a distance of five miles. These newcomers are rapidly becoming proficient in reading and writing in English.

Breeding Poultry Going Abroad

Market Opening Up In Many Parts Of the World For Record Of Performance Stock

Canadian poultry raisers and particularly those who are participating in the benefits of the Record of Performance, are finding a market for their stock in many parts of the world. One shipment made from Vancouver, in the month of February, included one thousand hatching eggs and twenty White Leghorn birds. This order was filled through the British Columbia Record of Performance Breeders' Association, that has already sent about three thousand eggs to Japan. The majority of the hatching eggs in this shipment were for the Japanese Experimental Farms system, while the breeding stock, consisting of five cockerels and fifteen hens from high record stock, were purchased by a Japanese breeder. The Live Stock Branch of the Department of Agriculture, within which the Record of Performance work is carried on, reports that of the eggs shipped to Japan last year the hatches were well over fifty per cent.

Opinion Has Changed

The change that has taken place in the mental attitude of the people of Canada toward its vast northwestern areas is simply amazing. At the present time it is admitted on every hand that this territory is no longer a barren wilderness, but a region packed with immeasurable potential wealth, which only awaits enterprise and capital for its development.

Birds have the most remarkable memories of all wild life.

FASHION

No. 941 — Simulates Two-Piece Style. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2¼ yards of 40-inch material with ½ yard of 36-inch contrasting.

No. 334—Smart Before. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1¾ yards of 40-inch material with ¾ yard of 36-inch black material for bolero and skirt, and ¾ yard of 40-inch material for waist and collar.

No. 941—Chic and Slender. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust, measure. Size 36 requires 3 yards of 40-inch material with ¾ yard of 27-inch contrasting.

No. 387—Perfect Foundation. This style is designed in sizes 16 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 2½ yards of 36-inch material.

No. 912—For Classroom. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1¾ yards of 40-inch material with ¼ yard of 36-inch contrasting.

Book, No. 11053—Six Conventional Motifs. Pattern contains charts for of 3 designs, 6 inches wide by 9 inches high (blue).

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Address: Fashion Department, Canadian Press Association, 73 Adelaide St. W., Toronto, Ont.

Make Soil Surveys For Establishment Of Agriculture On a More Scientific Basis

Reviving the Dead Sea

May Prove To Be the Source Of Untold Wealth

The discovery that the Dead Sea is capable of yielding many millions of value in minerals, useful chemicals and commercial products links up easily with the simultaneous information that Sir Herbert Samuels, former governor-general of Palestine, is sponsoring a plan to make the Holy Land a self-governing dominion of the British Empire. The plan of Sir Herbert contemplates a Jewish dominion; he is not particularly interested in the Arabian protectorate or mandated dependency which now exists in that country. The country cannot be Jewish, however, until there is a Jewish preponderance in the population and such a preponderance can only come to pass through a great and new industrial development of the region.

The Dead Sea may be made the source of untold wealth, to be exploited by Jewish capital, and at the same time the hydro-electric power developed which laborers in the Jordan, and the tremendous desolvity of the great slope from the highlands down to the level of the Dead Sea, the three millions of Jewish population that are regarded as requisite for a Jewish dominion may well be realizable.

The "Dead Sea," we call it. The Romans called it Lac. This name had its origin with a Jewish sect, the Pausanius. In the Scriptures, it is the Salt Sea, just as we call a something of similar body of water Salt Lake. And it is also called the Sea of the Cities of the Plain, in memory of the sunken cities which, with their wicked towns on its shores, or on its bottom, which were, according to the Bible, destroyed by a rain of brimstone, or, according to Sir William Dawson, by the outbursting of underground reservoirs of inflammable gases or petroleum which ignited and the brimstone are still there, and Sir Herbert Samuels may hope that the petroleum is too.—Boston transcript.

Fruits Of British Columbia

Almost Every Variety Of Fruits Now Grown On Pacific Slope

Most fruits except those indigenous to the tropics or sub-tropics, are now being produced in British Columbia. Apples apricots cherries, peaches, plums, prunes, nectarines, figs, loganberries, raspberries, strawberries, grapes, almonds and other less hardy fruits and nuts are now grown commercially. The principal crop is apples. The total crop of which has increased in the last 17 years from 230,000 bushels to over 3,000,000 bushels.

Recent experiments have shown that some districts of British Columbia are likely to become notable as producers of fruits, and vegetables that have hitherto not been grown in the province. Flowering bulbs are now being grown profitably.

Co-operative marketing is largely practised by fruit growers and farmers generally. A large percentage of the fruit produced in British Columbia is exported to distant markets, including Great Britain, the Orient and Australia. A horticultural branch is maintained by the Provincial Government to assist the industry.

In Need Of Publicity

New York Paper Has Queer Idea About Vancouver

Vancouver, which in voting some $3,000,000 this year for publicity purposes, might spend a few dollars or it New York to let New York know there is such a place. A New York paper, in alluding to Prince Williams feat, says: "The young Canadian is a sensation, and well he might be, as he stepped from the backwoods of Northwest Canada into fame with a dual victory at the 1928 Olympic games." Evidently Vancouver has still a lot to learn about publicity of self on the map.—Victoria Colonist.

On a Diet

Two men who had not met for a long time sat in a restaurant talking.

"How is old Scaggs, the company promoter, getting on?" inquired one.

"Oh, he's not been feeling well lately," was the reply. "He's had to keep to a very strict diet—just a little of certain foods."

"What's wrong with him? Indigestion? Insomnia?"

"No. In prison."

Now that a motorcycle has ridden along a tight rope it would seem that tight ropes are no longer safe for pedestrians.

The success of the pottage stamp is in this, that it doth stick to one thing until it doth arrive at its destination, and achieve its result.

Over 20,000,000 pairs of leather footwear were made in the 175 factories of Canada last year.

As much as $30,000 may be spent on the organs installed in the best movie houses.

Soil Surveys

To view of the widespread interest that is being taken in the procuring of settlers for the farm lands of Canada, and in the establishing of agriculture on a more scientific basis, W. A. Johnston, of the Geological Survey, presents some interesting facts about soil surveys. He states that soil surveys have been carried on to some extent during the past few years by the provincial governments in the prairie provinces, that land classification work has been done by the Department of the Interior, and that the mapping of soils which is primarily a geological problem, has been conducted by the Geological Survey.

A soil survey of any area shows the character and location of the several types of soil in the area and thus provides information regarding soil conditions that is of value not only to the farmer but to the scientific agriculturist outside the area who is called upon to give advice regarding questions of the soil improvement and who is engaged to solve problems regarding the most effective uses of certain kinds of soil. The fundamental principles of a soil survey is that each type of soil is best adapted to certain kinds of crops and requires the same kinds of farming practices and methods of soil improvement. It is held by scientific agriculturists that the art of agriculture is, indeed, the most fundamental of all the sciences, is the least developed, and it is well understood that there are at least a few distinct types of soil in each of the physiographic provinces that require different methods of cropping and farming practice. A soil survey in many cases reveals important problems of soil improvement and farm practice. The need also for early a question of the character of the soil, for some soils can be cropped continuously much longer than can other soils. Again, the question of soil drifting, which has become a serious problem in many parts of the prairie provinces, is largely a question of the character of the soil, for some soils drift badly whereas others do not. A soil survey also affords a guide in the buying and selling of farm property, and in the selection of land for particular purposes.

Soils may be classified in several different ways, depending upon the point of view of the investigator. A purely geological classification, that is according to the physical character and mode of origin of the soil, may be inadequate from the point of view of the scientific agriculturist, but must be taken into consideration in any scheme of classification. The geological classification certainly distinguishes soils in broad different types of soil in a single physiographic area. The number may be increased if necessary, but it is apparent that is no need at present for any elaborate classification. The soils in Canada as geologically mapped include undrift sheets, dunes sands, alluvium of streams, lake or marine sand, silt and clay, and glacial drift in its various forms, such as moraines of the ice-sheets, kames or gravel hills and outwash sand plains.

The Geological survey has mapped and described the soils from the point of view of origin and physical character in several areas in Canada, in the vicinity of Ottawa, in the Bow River District, Ontario, in southeastern Manitoba, and in the Winnipeg-osis District of Manitoba. The three latter areas were mapped especially for the purpose of supplying information to intending settlers. Recently the mapping has been extended to cover the greater part of southern Manitoba up to latitude 52 degrees, and it is proposed to issue a map covering this area.

Oldest Banns

What is claimed to be the oldest razor extant was recently discovered by M. Dharvent, a French archaeologist, in a sand quarry at Mouliercies-Amiens. It has a handle and blade similar to the modern razor and was found with other "tools" which have been traced back to about 8,000 B.C.

Father (arriving home) — What's your little brother crying for?

Johnnie—He's not crying for anything—he's had it.

WORLD HAPPENINGS BRIEFLY TOLD

A survey of Fort Churchill will be undertaken immediately by the provincial government for the purpose of laying out a model townsite at Manitoba's seaport.

Charles Angers, former member of parliament, is dead at Quebec, at the age of 74 years. He represented Charlevoix County, at Ottawa, in 1896. He was a Liberal.

Regina's assessment for 1929 will be two and a half million dollars greater than the amount upon which 1928 taxes were struck, it was estimated by R. J. Westgate, city assessor.

Soviet Russia on March 12, celebrated the 12th anniversary of the breaking out of the revolution which resulted in the abdication of the Czar. All shops, business houses and government institutions were closed.

League of Nations officials announced that an agreement had been practically reached on the main points of the protocol for adherence of the United States to the world court of justice.

More than half a billion pounds of dangerous explosives were handled by railroads in the United States and Canada in 1928 without injury to any person, and with a property loss of only $77, the American Railway Association announced.

The Polish newspaper Rzeczpospolita says it has learned Pope Pius will begin a tour in 1930, visiting Trieste, Zagreb, Budapest, Cracow, Warsaw, Vienna, Munich, Brussels, Dublin, Paris, Madrid and Lisbon.

Bankruptcy proceedings have been instituted against Princess Victoria, sister of the former Emperor, The Princess, who is living in seclusion at the palace in Bonn, Germany, declined to make a statement. The first meeting of her creditors was called for April 4.

Indians Bring Weird Story From North

Report Finding Body Of White Prospector Standing Upright

One of the most mysterious deaths that has ever been reported from the inland reaches of northern Ontario has sifted down from the far outposts. Trappers and prospectors who have experienced the biting, lifewasting cold of that section do not scoff at its possibility.

According to the report an Indian party engaged in running trap-lines in the region of the headwaters of the Attawapiskat, discovered lately the body of a white man standing bolt upright, with one foot slightly advanced as if he was about to take a step when suddenly stricken. The body was as hard as a board and was firm in its usual position. The Indians found the man's snowshoes were firmly anchored in slush ice. There were neither marks on the clothing nor anything in the prospector's sack that would indicate his identity, according to the report.

Recovery of the body cannot be made until summer, it was stated.

Early Heat In Antarctic

Willkins Party Halted By Melting Ice At Expedition Base

The Antarctic was almost too warm for airplane exploration during the time the Wilkins expedition was at its base at Deception Island early this winter Sir Hubert Wilkins, leader of the party, said after his arrival from South America.

The earliest summer season in 14 years melted ice at the expedition base and deprived Wilkins of the use of more-equipped planes, the explorer said.

Wilkins said he made no attempt to reach the south pole, approaching only within 60 miles of it, devoting his time to preliminary survey for weather observation stations in the Antarctic.

We get all the sugar essential to our needs from bread, starch and other natural foods.

Governments Asked For Aid

Jack Miner Wants Grant For Work Of Bird Sanctuary

Jack Miner—a name almost synonymous with safety and sanctuary for birds—has sent a letter to each member of Parliament in Canada asking for a grant to carry on the work of the bird sanctuary at Kingsville, Ontario.

The sanctuary started by Jack Miner in 1904 has proven a model for others founded through the world, including those of Russia and the United States of America.

Birds have been coming to the Miner sanctuary for over a quarter of a century and during the last six years the feed for the birds has cost on an average between $5,000 and $6,000 per year.

An appeal in 1910 has been received from the Dominion Government and a grant of $400 from the Ontario government.

Jack Miner has charged no one for the use of the land on which the bird life oasis is situated in the deadly desert of hunter's guns, with deadly pulse of birdsnot scattered here and there.

In addition to providing a place of safety for the birds the total popularity of Jack Miner has tagged all birds he possibly could that have landed on the ponds in the sanctuary.

He carried on the work for 15 years with no assistance from any government, all funds being provided by himself. Later he raised funds from his series of lectures across Canada and in the United States.

Sugar Imports Are Heavy

Canada Produces Only Small Part Of Annual Requirements

Fortunately for Canada's producers of the world, the consumption of that valuable food, if it has not kept pace has, at least, enormously increased in the United States and Canada in 1928 without injury to any person, and with a property loss of only $77, the American Railway Association announced.

The Polish newspaper Rzeczpospolita says it has learned Pope Pius will begin a tour in 1930, visiting Trieste, Zagreb, Budapest, Cracow, Warsaw, Vienna, Munich, Brussels, Dublin, Paris, Madrid and Lisbon.

Bankruptcy proceedings have been instituted against Princess Victoria, sister of the former Emperor. The Princess, who is living in seclusion at the palace in Bonn, Germany, declined to make a statement. The first meeting of her creditors was called for April 4.

Canada produces only small fractions of the total consumption of that valuable food, if it has not kept pace has, at least, enormously increased in the United States and Canada in 1928 without injury to any person, and with a property loss of only $77, the American Railway Association announced.

The Polish newspaper Rzeczpospolita says it has learned Pope Pius will begin a tour in 1930, visiting Trieste, Zagreb, Budapest, Cracow, Warsaw, Vienna, Munich, Brussels, Dublin, Paris, Madrid and Lisbon.

Canadian Press Tour

Newspapermen Will Tour British Isles and Continent, Sailing March 30

Arrangements for the Canadian Press Tour have now been completed. The party will sail from Montreal on the C.P.R. Montclare on Saturday, June 6, and will arrive at Cherbourg, Friday June 14. After five days in Paris the party will visit Austria, Czecho-Slovakia and Germany. They will proceed to Wiesbaden, and go down the Rhine to Cologne, thence to Brussels and Le Hague. Ten days will be spent in London, the Shakespeare country will be visited, also the Lake District, Lancashire, the Trossachs and the Burns country. The party will sail for home on the beautiful "Duchess of Atholl" on July 31. The inclusive rate for the trip will be $825.00 per person. Rough copies of the itinerary may be procured from Mr. Rupert Davies, of the Whig-Standard, Kingston, who has made all the arrangements, and who advises that no time like the present to book your visit. Mr. H. M. MacCallum, Assistant Steamship Gen. Passenger Agent, Canadian Pacific Railway, Windsor Station, Montreal. A reservation fee of $100.00 is requested and the balance by May 6, thirty days before sailing date.

Game Fishing In Canada

Fishing for sport has its devotees in all parts of the world, but the game fish as the salmon of the Restigouche, the black bass of the Quebec and Ontario highlands, and the trout of the Nipigon. Sport fishing is also an important feature of the wild life of Western Canada. It forms one of the chief attractions of Canada's national parks.

By living on board private yachts moored on the River Thames, near Westminster, a number of Londoners escape paying rent, rates and house duty by rates for a mooring fee of three guineas a year.

Because of the housing shortage in Germany, nearly 300,000 young married couples are living with their parents-in-law.

Pupils in Scotland have to get through about three times as many books in the school year as London school children.

An elephant's bath requires 150 pounds of soap and more than $100 worth of the purest Indian oil.

SKI CHAMPION

Canada's Arctic Gateway

Some Of the Striking Advantages Possessed By the Hudson Bay Route

In the current issue of the New Republic appears a signed article by Mr. D. M. LeBourdais, of this city, on "Canada's Arctic Gateway" and it gives, in a striking way, an idea of the importance and significance of the Hudson Bay route to Europe.

The people of Canada, long held back by restraining influences, especially in the eastern provinces, have been slow to perceive in their full meaning the advantages that must flow from this new outlet from the heart of the continent to the markets of the old world.

A few of the advantages are striking. Put briefly LeBourdais, after when he points out that Fort Churchill is one hundred miles nearer to Vancouver than to the coast of Labrador. That gives some idea how far inland salt water reaches. Churchill is one hundred miles further west than Duluth, and miles further west than St. Paul. Yet it is one hundred miles nearer Liverpool than Montreal.

The Hudson Bay route would, if served with a complete railway system, shorten the distance from Liverpool to Regina by four hundred miles. "Only recently," Mr. Lebourdais writes, "have Canadians come to realize that their country is the only one in the world that is bounded by three oceans; and that the Arctic, so far as Hudson Bay is concerned, is hardly less available than Atlantic or the Pacific."

After two years of governmental inquiry it has been learned that Hudson Strait is open to navigation until at least the middle of November and sometimes, probably, until the end of the month. It is claimed by some that the season of navigation will be nearly as long as that by way of the St. Lawrence, but even though it may be quite a bit shorter than that its value to Canada may well be enormous.—Toronto Star.

Prophecy Was Fulfilled

High Achievement Of Marshal Foch Foretold By Late Pope

In an article on the life of Marshal Foch, the Detroit Saturday Night says: His was a life of devotion to France, and that country has never be made the world his debtor, for it was under his command that the allies marched to victory.

Before the war the world had heard little of him. But there was one who had early recognized this great military genius and foretold his high achievement still the gift of true prophecy. Twenty years ago, five years before the first gun was fired, Lord Roberts, of England, was calmly pleading with his countrymen to prepare for war with Germany, and said during a visit to Canada:

"They refuse to believe me, and we are sleeping under a false security, for I do not hesitate to affirm that we will have a frightful war in Europe and that before long. It so happens that the hardest experience of their existence. They will, in fact, see defeat very near, but the war will not be over by the genius of a French general, named Ferdinand Foch, professor in a military school in Paris."

The fulfillment of that prophecy resounded in the acclaim with which America received Marshal Foch after the victory which he had cherish the memory of his visit here.

Sugar Beets a Paying Crop

Sugar beets proved the best-paying crop in the Taber Barnwell irrigation district last year, returning an average of $69.58 per acre. Alfalfa came second, with $25.85 per acre, and wheat third, with $23.27. The average production per acre in the project was worth $28.67.

France is 214 miles nearer New York than San Francisco and England is 145 miles nearer than Los Angeles.

Help your children to have sturdy bodies, sound teeth and strong teeth. Give them

Scott's Emulsion

rich in vitamins. It serves the needs of childhood equally as well as it does grown people.

Scott & Bowne, Toronto, Ont. 32-29

A Great Canadian

Prof. Shotwell Was Close Adviser Of Woodrow Wilson and One Of the Authors Of Kellogg Peace Pact

Mr. E. J. Garland and the Prime Minister deserve thanks for disclosing to Parliament recently that one of the real authors of the Kellogg Peace Pact is none other than a Canadian, Prof. Shotwell, of Columbia University. Canada has given many notable figures to the international, commercial and academic life of the United States. It is doubtful whether she has given anyone who has made a more distinguished contribution to the republic than Prof. Shotwell. Born in Canada and educated in Canada, Prof. Shotwell stands today as one of the most eminent figures in the whole scholastic field of the United States. His name, indeed, is known wherever international or world politics is discussed; the pity is that it is not better known among his own countrymen here in Canada.

Prof. Shotwell first arrested world attention when he became one of the close advisers of Woodrow Wilson in the sphere of foreign affairs. When the Peace Treaty of Versailles was in the making, he was in Paris and later on, in pamphlets and numerous volumes and newspaper articles and lectures he has dealt with the international questions with a scholarship and sure grasp of realities rivalled by few of his contemporaries.

Prof. Shotwell, in fact, must be ranked among the greatest of living Canadians. The pity is that, like Stephen Leacock, he is an exile from the land his talents could serve so well.

STEWARDSHIP AND MISSIONS

Golden Text: "It is required in stewards, that a man be found faithful."—I Corinthians 4:2.

Lesson: Genesis 12:1-3; Deuteronomy 8:17, 18; Joshua 3:1-10; Malachi 3:7-12; Matthew 28:18-20; Acts 1:6-8; 13:1-3; 26:12-20; Romans 1:14-16; 1 Corinthians 16:2; 2 Corinthians 8, 9:7; 9:1-15.

Devotional Reading: Psalm 9:1-8.

Explanations and Comments

Stewardship In Regard To Missions Acts 1:6-8.—The apostles met Jesus on the Mount of Olives, and there they asked Him if at that time He would restore the kingdom to Israel. Their question shows how well-night impossible it still was for the apostles to rid themselves of the common Messianic expectation of the Jews. But the Christ would rule over a Jewish nation independent of Rome and herself dominant, politically and religiously, over the other nations of the world. "It needed the historical outpouring of the Holy Spirit to teach the apostles that Christ's Kingdom was not of this world."

"It is not for you to know the times or seasons, which the Father hath set within His own authority," was the answer of Jesus. "It does not belong to Me will restore the Kingdom to Israel; not, however, to 'restore' Israel, as the apostles had imagined but to 'the Israel of God,' to Christ's Christian believers of every nation, by making Christianity the dominant religion.

"O God, I pray Thee for the childlike That can enjoy—all vexing things apart!—

The beauties Thou in heaven and earth doth show,

Nor fret myself with things I do not know!"—Babcock.

Verse 8. Jesus promised power through the coming of the Holy Spirit, and gave His great commission. They were to be His witnesses both in Jerusalem and in all Judaea and Samaria, and to the uttermost part of the earth. Some one has called this the missionary note of the ascension, state missions, home missions, and foreign missions. The Acts records the story of how the apostles carried out the commission. "The uttermost part of the earth" is represented by Rome, the capital of the Empire, the place where the irenaeus said, "All met from every quarter."

This message always hurts me when I think of the vast tracts of earth that have never heard the name of Christ."—G. Campbell Morgan.

Solidified Sunshine

Served To New York Diners Under Artificial Sunlight

Nature received a workout in New York, when a thousand persons in evening clothes sat under 500 artificial sunlight of 10-kilowatt Kileg lights in the Hotel Astor's grand ball room, and ate samples of genuine sunshine, pure, solidified, edible sunshine on the half shell.

The serving of irradiated yeast or edible sunshine was only a small item of the annual science dinner of the American Institute. A flame was shown which converted its heat directly into magnetic force, sustaining the weight of a man.

Samples were exhibited of the new alloy of tungsten, carbon and cobalt, called carboloy, which was hailed as "the first important contribution to the art of cutting tools since the introduction of high speed steel," being exceeded in hardness only by the diamond.

A lightning machine was demonstrated, and also the photphone, an instrument by which light can be sent over light waves.

Electric Power In Alberta

Transmission Lines Spreading Over Province At a Rapid Rate

The rapid rate at which electric transmission lines have been spread over the province of Alberta, especially during 1928, is indicated in a recently issued government report. A network of high tension lines now radiates east and west, north and south over the central and southern part of the province. There is a continuous line from Edmonton in the north to Coutts on the United States bridge, in the south, with the exception of the gap of less than thirty miles between Millet and Ponoka still to be closed.

One power company, with headquarters in Calgary, is operating 332 miles of 66,000-volt lines and 46 miles of 13,200-volt lines. Of this mileage approximately 50 miles of 66,000 volt lines, and 476 miles of 13,200 volt lines were built during 1928, and the company's territory in the north now extends as far east as Wainwright and Hardisty.

Western Progress

The thriving city of Regina established a notable record in 1928, in attracting new industries. During the last past year 12 important industrial concerns located in Regina. They are said to have expended about $5,000,000 in sites, buildings and equipment, and they will employ well on to 2,000 men. Housing accommodation was built last year for 1,000 families, and building has not yet caught up to the demand.

A thought that comes in the few seconds one sits on an icy pavement is that Sir Isaac Newton need not have waited for the apple to fall to suspect gravity.

The total acreage under pasture in Canada in 1928 was 9,528,043 acres.

Animal Shop Was Wrecked By Monkeys

Released Themselves From Cage In New York Store

Two monkeys released themselves from their cage in a New York animal store, and before their escape was discovered they had wrung the necks of 850 canaries, a rare parrakeet, and killed a half a dozen fantail goldfish.

A policeman who saw one of the monkeys in the act of slaying the parrakeet in a display window forced the door open and saw the other crawling about the floor through a layer of bird feathers, frantic songsters beating their wings in terror against the walls, goldfish wriggling on counters and a large baboon working hopefully on the door of his cage, which had been partly opened by the monkeys.

One old parrot whose tail feathers had been torn off, cursed monotonously as he walked up and down his perch.

One of the monkeys submitted peacefully and was soon back in his cage. But the other lurked bird cages at his pursuers and was taken only after he had become engrossed in the task of pulling the tail feathers from a cathaloid parrot.

Take Daylight From Air

Reproduction Of Light Said To Be Next Wonder

A radio aerial draws radio waves out of the air. Radio treats essentially with sound. Absorption and reproduction of light, by a method strikingly similar to radio is likely to be next. R. D. Gee, London, Ont., inventor, president of the R. T. Gee Company, Limited, manufacturer of electric light bulbs, is the discoverer. The process, it states, will be soon available for general use. When it is introduced, it is stated in scientific circles it will revolutionize illumination, which is today chiefly created by electricity. For, in addition to drawing energy out of the air and reproducing it, Mr. Gee's method provides for the storage of such energy until it is needed. This storage, it is explained, is like aerials at work in the daytime will not only absorb but also store sunlight for reproduction at night.

Tested Rocket Sled

A "rocket sled" was tried out at the Indianapolis aviation grounds by Max Valier, inventor of several rocket vehicles. The sled weighs 240 pounds and can be equipped with eight rockets. Using only two rockets, made fine speed on level ground. Spectators tried to visualize the speed that could be made down a snowy slope under the impetus of the rockets, but gave up the attempt before reaching definite conclusions.

Steam Trawling Off Canada's Coasts

Steam trawling, as it is carried on in the North Sea, was introduced on the Atlantic coast of Canada several years ago. There are now 14 steam trawlers operating from Nova Scotia ports. They operate practically the whole year and their catches are utilized entirely for the fresh fish trade.

Receives Bronze Medal

Award Of Merit Goes To Nine Year-Year-Old Girl At Vermilion

Announcement of awards for bravery were made by the board of governors of the Royal Humane Society at Hamilton.

No silver or gold medals were awarded by the third mark of merit, a bronze medal was conferred upon little Rosette Annette, the nine-year-old girl who on the night of Nov. 12, 1928, saved six children from death in a burning farmhouse at Vermilion, Alberta. When the house in which she was employed became a mass of flames, she awoke the children, waking the farmer's family, and carried or dragged them all to safety. There was a seventh child who ran back into the house after being rescued, and Rosetta returned for her. It was too late, however, and the tot lost its life. Hon. R. B. Redd, provincial treasurer for Alberta, made the recommendation on Rosetta Annette's behalf.

Other medals awarded included one to John Pritchard, Grindrod, B.C.

Parchment awards were conferred upon the following westerners: Florence Monteith, Joseph McConnell and Frank Chase, of Chase, B.C.

Change Bread To Cake

Here's the Magic Recipe

Cut slices of day-old white bread ¾ inch thick. Trim off crusts. Cut each slice into strips ¾ inch wide by 3 inches long.

Spread these strips on all sides with Eagle Brand Sweetened Condensed Milk, covering bread well.

Roll strips in dry shredded coconut, broken very fine. Place in pan and brown very delicately on all sides in deep fat. Remove, or toast on a fork over coals.

Delicious little cocoanut cakes result—thanks to bread. Taste just like Angel Food cake.

Try them! This and dozens of other magic recipes are found in the Eagle Brand Book "Tested Magic in the Kitchen." Write for your free copy to The Borden Co., Dept. 140 St. Paul St. W., Montreal, mentioning this paper.

Tax On Bachelors

Cuba Has Some Advanced Ideas On Legislation

Cuba is not the only country that imposes a tax upon its bachelors, but it is doubtful whether any other nation has shown the enterprise of establishing a governmental matrimonial bureau where spinsters must file their photographs. That, indeed, is precisely what Cuba is now satisfied with collecting every year its ten dollars from all bachelors who persist in eluding the wile of women. If it moved by nobler and farreaching ideals. It would bring together those lonely souls, mals and females, who perhaps through an inferiority complex feel unable to take the necessary steps which might lead to courting and the altar. — Springield Union.

Shaved Rare Tact

On a certain railway station there was a garrison of marines as well as bluejackets, with a senior officer of each corps. Their two seats was laid claim to a special pew in the little church, and after much acrimonious dispute an appeal was made to the former to decided a patient hearing to each claimant, and decided that the pew should be occupied by the elder of the two. Result, the pew was never occupied by either.

There's a Reason

Tea, it is rumored, can be improved somewhat by following the Siberian custom and adding just a dash of rum. Once when entertaining in Shanghai, a friend of mine gave tea thus embellished to a missionary, but served the ordinary variety to his wife.

"I just can't understand it," the good lady remarked about half an hour later. "At home John won't touch tea, and here he's having his fifth cup."

Mrs. Thatcher: "So sorry to hear of your husband's illness. Is he improving?"

Mrs. Powers: "He's feeling better, if that's what you mean!"

Here and There

(2259)

Although Canadians have been styled strong "silent" men there seems little to support the reputation in the recent announcement that they are the world's greatest telephone conversationalists. There are 1,253,367 telephones in Canada, recently published statistics disclose, allowing for a phone for every eight persons. If all the conversations that took place during the past year were placed end to end they would be heard in Mars, for every citizen held on an average of 221 conversations during 1928. Presumably this does not include wrong numbers.

One of Montreal's first big buildings that was demolished to make room for one of the latest skyscrapers downtown has appeared on an entirely new site, to the amazement of the citizens. So carefully was the building taken down that scarce a score of new stones were required to complete its reconstruction on its new lot.

Up to December 31, 1928 the Canadian Pacific had spent in colonization and Canadian development work, land settlement, etc., nearly $65,000,000 of its own money.

Sir Charles Gordon, G.B.E., president of the Bank of Montreal, has been appointed to the board of directors of the Canadian Pacific Railway to fill the vacancy caused by the resignation of Sir J. K. L. Ross. Senator the Hon. P. L. Beique, also, has been appointed a member of the executive committee of the board.

A shipment of animals that will resemble the cargo of livestock on Noah's Ark will take place shortly from Moose Jaw Wild Animal Park, when a number of buffalo, mule deer, elk and other animals will be sent to the Rocky Mountain National Park at Banff, Alberta.

Everyone in Canada is worth $270 if, on any rate, is what government figures show, the aggregate national wealth for 1928—$26,091,000,000—working out of that amount per person. Agriculture is the largest single item, and the western provinces come first in the list of Canada's wealth of any part of the Dominion.

The Canadian Pacific Railway, in co-operation with the Manitoba Department of Agriculture, Seed Branch, Dominion Department of Agriculture and the Manitoba Agricultural College, has provided two good seed cars and a poultry car which is travelling through that province. There are demonstrations of grasses, clover and corn, and poultry displays, while accompanying lecturers talk on the importance of good seed and forage crops, and lecture on the rearing of chickens, turkeys, etc.

It's a trifle early to put up the window screens.

A girl may be proud of her ability as a cook, but she does not want to be admired for that alone.

Minutes of M.D. Council Michichi

The Council of M.D. Michichi, No. 277, met at the Council Chambers, Michichi, on March 13th, 1929, at 11.00 a.m. All members were present.

The newly elected members—Div. 2, H. J. Morrow; Div. 4, D. H. McDermid; Div. 5, J. Knapp, took the oath of office.

Moved by Coun. Wilson that W. J. Tabor be appointed Reeve. Carried unan.

The minutes of the meeting of Feb. 12th, 1929, were read. Moved by Coun. Edmonson that the minutes be adopted. Carried unan.

Moved by Coun. Edmonson that the Sec-Treas., W. S. Turner, be paid a salary of $1,800 per annum, with office help for the two months at the close of each calendar year. Car. unan.

Moved by Coun. Dermid that the regular meetings of the Council be held on the second Tuesday of each month, the April meeting to commence at 11.00 a.m. Car. unan.

Moved by Coun. Edmonson that Coun. Wilson be appointed Dep. Reeve for the next six months. Car. unan.

Moved by Dep. Reeve Wilson that the Councillors receive $4.00 per day and the Reeve $5.00 per day for attendance at Council meetings as allowed by the Municipal Act, with 10c per mile travelled. Car. unan.

Moved by Reeve Tabor that C. Christian, C.A., be appointed auditor for the current year at $150.00 salary. Car. unan.

Moved by Coun. Knapp that adjournment be made for lunch, Meeting assembled at 1.30.

Moved by Coun. Edmonson that an advance appropriation of $500.00 be granted each Division. Car. unan.

Moved by Coun. McDermid that W. S. Turner be the delegate to the Hail Board Convention to be held at Calgary, March 20th next. Car. unan.

Four applications for Weed Inspection were laid on the table. Moved by Coun. Edmonson that a weed inspector be appointed for one year, from April 1st (or or about), and that he be paid a salary of $100 per month for the first seven months with an expense allowance of $100 per month, and for the balance of year that he be paid for services at the rate of $4.00 per day, with 10c per mile necessarily travelled whenever in the interests of the municipality it is found by the inspector that he should be on duty. Car. unan.

Moved by Coun. McDermid that T. S. Branson be appointed Weed Inspector under the terms of the previous motion. Car. unan.

Moved by Reeve Tabor that six cases of Go-For-Em of Gopercide be purchased. Car. unan.

Moved by Reeve Tabor that Dr. Brogden be appointed Health Inspector under terms of his previous engagement for the ensuing year. Car. unan.

Moved by Reeve Tabor that the account of the Canadian Northern Townsites Co. for land expropriated in the Village of Delia be not paid, but that the Co. be advised to communicate with the Sec-Treas. M.D. 306. Car. unan.

Moved by Coun. Knapp that $50 be paid for land expropriated in the N.E. 19-30-19, W 4, and $20 for land taken in N.W. 20-30-19 W 4 as per Road Plan 2247 M.D. Carried unan.

Moved by Deputy Reeve Wilson that the following approved accounts be paid:—

Dr. Brogden, M.H.O.	$100.00
Registrar Land Titles—Advance Account	100.00
Petty Cash	28.90
M.D. 306, Expropriated Land South of Delia	108.25
W. Municipal News, office supplies	18.15
Dr. W. A. MacDonald, quarantine	10.00
Whitlock Lumber Co., Div. 3	49.82
J. Cramer, R.O.	12.00
Pay Sheet No. 3, Div. 4	22.00
" " No. 4, Div. 1	20.00
" " No. 4, Div. 3	3.00
" " No. 5, Div. 5	5.50

Discussion of the probable locations for the expenditure of the Department of Public Works Grants, which have been increased over previous years, occupied the Council for considerable time together with the consideration of the appropriations for the year. The Council decided to take these matters up at the next meeting for final decision.

Mr. McMullen, of the Midland Mining Co., wrote asking for improvements on road leading to mines and offering assistance in keeping same in good repair.

Mr. F. L. McFadden and Messrs. McDaniel & Rushton made application for road construction contracts.

Moved by Coun. Edmonson that the meeting adjourn. Car. unan.

Many persons are able to boast of opportunity knocking.

Money may get a man into trouble, but it's usually more helpful in getting him out.

A word from the publisher . . . about advertising

THE products you see consistently advertised in this paper are worthy of confidence.

It takes two things to make a consistent advertiser. One is a strong conviction that he has a product that will hold its place in public favor despite competition. The other is actual proof of that . . . the increasing popularity of his product.

If his product will not stand the test of comparison he would simply be throwing his advertising investment away. If the buying public rejects his product after it has been offered in advertising he *has* thrown his advertising investment away.

That's why the manufacturer who advertises his merchandise consistently is very sure of his quality . . . and why you may be sure of it, too.

Read the advertising here in your newspaper . . . it will guide you to the buying of worthy merchandise

New Telephone Exchanges to be Built

Contracts were let during the past month by the Alberta Government Telephone System for the erection of new exchange buildings at Drumheller and the Calgary West office. It is expected that work will start on those buildings about March 15th. Plans have also been completed for new buildings at St. Paul, Hanna, and Grande Prairie.

Dairy Pool to Have New Home

A building permit has recently been issued to the Alberta Dairy Pool Limited for the construction of a $20,000 brick building at 10531-102nd Street, Edmonton. The building will be of sufficient size to handle satisfactorily the ever growing central office activities of the Dairy Pool.

LOVE AND WISDOM

Ignorant love has a thousand times more power than cold wisdom.—John Colet.

Lord Nelson at Halifax Opened

Above, the Lord Nelson viewed as from the Botanical Gardens. Inset is a very charming corner of the lounge showing the bust of Lord Nelson in the corner. Mr. E. W. Beatty was the guest of honor on the formal opening.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, in speaking as guest of honor at the banquet which marked the official opening of the Lord Nelson Hotel at Halifax, referred to the tourist attractions of Nova Scotia as being second to none on the continent. This from as well travelled a man as the head of the World's Greatest Travel System was a decided appreciation. "In addition to the opportunities for sport which are unsurpassed and attract tourists from both the United States and Canada, you have the historic associations such as typified by the Evangeline legend which the Canadian Pacific and Dominion Atlantic Companies have successfully preserved and featured. It seems to us only right that the railway which came into existence as a fulfilment of one of the terms of Confederation should encourage such travel to your cities and other historic places," he said. "That travel has grown apace during the last few years and it was because of this fact among others that at the solicitation of your business men we joined with them in the building of this hotel. It is for the same reason that we are building a modern hotel with other tourist facilities at Digby."

The Lord Nelson Hotel, while operated under the direction of the Canadian Pacific Railway is the result of a sincere effort on the part of the people of Halifax who have long been working for a modern hostelry which would adequately take care of the business which offered in the city. It is situated in the heart of the city and fronting on the Botanical Gardens that have helped to make this old city famous.

Within and without, the appearance of the hotel reflects great credit on its architects and builders. In building and in decoration it is Georgian in character, and throughout the hotel and particularly in the public rooms, a most successful effort has been made to express the period recalled by the historic name associated with it. Immediately inside the front doors is a handsome and spacious lobby, which at once gives the keynote of Georgian decoration. The hotel offices are here as also are the other public services such as elevator lobby, telephone room, cigar shop, etc.

The mezzanine floor and ladies waiting room leads up from this, and on one side of the lobby is a short flight of steps leading up to the assembly lounge. In this room and in the adjacent assembly hall the attempt to recapture the atmosphere of two hundred years ago has been particularly successful. The chief feature is the fine fireplace over which is an excellent copy in oils of the full length portrait of Lord Nelson which was painted shortly before his death. In one corner stands a fine copy of the well known bust of this hero, and on the center table is a splendid model of his ship "The Victory."

The end of this room opens into the assembly hall which is large enough to seat about 250 people comfortably. At one end is an ample stage with the usual dressing rooms and disappearing footlights.

Leading from the other side of the lobby up a short flight of marble steps is a foyer, and beyond that, the main dining room. On the floor beneath the lobby are a series of fine shops opening on the street, and here also is the spacious grill, which in keeping with the nautical flavour notable elsewhere in the building, is termed "The Ward Room".

Its woodwork is of oak and its ceiling crossed by hewn beams. It is lit by ships lanterns of brass and by candelabra designed from binnacle lights and ships steering wheels. The furniture also is of stout oak. Other features of this floor are a barber shop, beauty shop and the usual public services.

The bedroom floors include a number of fine suites of which the Royal Suite is an outstanding example. Like the other the character of decoration is in keeping with the rest of the hotel. It consists of sitting room, dining room and two bedrooms, and its furnishings include some fine examples of early Georgian. The bathrooms and general plumbing and heating arrangements throughout are up to the most modern standard as also are all the facilities for public service.

An INVITATION

SPECIAL PRESENTATION of The Outstanding Chevrolet of Chevrolet History

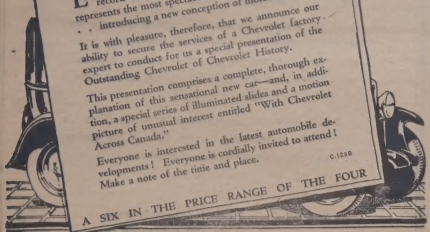
EVERYONE is familiar with Chevrolet's brilliant record of past success, but the new Chevrolet represents the most spectacular of all its achievements . . . introducing a new conception of motor car value.

It is with pleasure, therefore, that we announce our ability to secure the services of a Chevrolet factory expert to conduct for us a special presentation of the Outstanding Chevrolet of Chevrolet History.

This presentation comprises a complete, thorough explanation of this sensational new car—and, in addition, a special series of illuminated slides and a motion picture of unusual interest entitled "With Chevrolet Across Canada."

Everyone is interested in the latest automobile developments! Everyone is cordially invited to attend! Make a note of the time and place.

C-1228



A SIX IN THE PRICE RANGE OF THE FOUR

On SATURDAY, MARCH 23rd, at 3.00 p.m.
In Farmers' Hall, Craigmyle

G. W. Delsing, Craigmyle, Alta.

Minutes of M.D. Council of Lambton

The Council met at Delia on Wednesday, March 18th. All Councillors were present. The new Councillors signed oath of office.

Mr. G. Long, Returning Officer, called for nominations for Reeve for ensuing year.

Moved by coun. Chapman that coun. Hawkins be re-elected Reeve.

Moved by coun. Simpson, that coun. McDonald be appointed Reeve.

There being no further nominations these two names were noted on, and the Returning Officer declared coun. Mc. Donald elected Reeve for the year.

Mr. E. Nelson was nominated Deputy Reeve for by coun. McDonald, and there being no other nominations, Mr. Nelson was elected Deputy Reeve for six months.

Moved by coun. Nelson that G. H. Ross be re-appointed Sec-Treas. at an annual salary of $2,100.00.

Moved by coun. Simpson that Messrs. W. H. A. Thompson & Co., be appointed auditors for the year, and that they be paid $125 and travelling and hotel expenses. Carried.

Moved by coun Nelson that the Councilors be paid $4.00 a day for road supervision, not exceeding 15 days, and 10c a mile for every mile travelled in connection therewith but not exceeding 200 miles; that the Reeve be paid $5.00 and each councillor $4.00 for each council meeting attended and that the Reeve and councillors be paid 10c a mile for every mile travelled in attending council meetings. Carried.

Moved by coun. Chapman that the Reeve and Secretary be authorized to transact the banking business on behalf of the municipality, and to sign all cheques; that the secretary be authorized to make deposits and sign receipts for cancelled vouchers. Carried

Moved by coun. Chapman that we make the following grants—$100 to the Delia Agricultural Society, $50 to Junior Red Cross Society, and $100 to Salvation Army. Carried.

Moved by coun. Chapman that we appoint $100.00 to the Delia and Craigmyle Cemeteries to beautify same.

Moved by coun. Hawkins that H. B. A. Kirkeby does not pay the amount he owes on the purchase of fractional N.E. 1-35-18-4, which was sold to him under tax recovery proceedings, we put the land up for sale again. Carried.

Minutes of previous regular meeting were read and on motion of coun. Nelson were adopted.

Letter was read from Mr. McQueen, district engineer, giving his opinion on the request of Mr. Braaum to have the slough drained and the diversion straightened out on the west of sec. 9-31-16-4.

Moved by coun. Nelson that a copy of the district engineer's letter to sent to Mr. Braaum, and he be advised that in view of the recommendation of the district engineer, the council cannot consider straightening out this diversion.

A letter was read from Mr. McEachie offering to re-assess the district for $1,000.00. Considered that this figure too high. coun. Chapman thought we could get Mr. H. Lund, who is a very good worker for Dowling Lake Municipal District at last assessment, to do the assessment for us at a reasonable figure.

It was moved by coun. Nelson that Mr. Lund be asked to tender for the work of assessing, and that Mr. McEachie be interviewed to see if he would not come down a bit in price. Carried.

Moved by coun. Chapman that coun. Simpson be appointed delegate to the Municipal Hall Convention. Carried.

A letter from Department of Public Works regarding the 1932 grants for road work was read

Letter was read from Mr. J. E. Hiore resigning as pound keeper. It was moved by coun. Hawkins that we ask Mr. Hiore to reconsider his decision in this matter, and advise him that the pound will be put in good repair. Carried.

Secretary was instructed to write Consumers Lumber Co. for price on small car of planing.

The question of giving prizes to school children for essays on noxious weeds was considered.

Moved by coun Hawkins that we appropriate $50.00 for prizes for the essays on noxious weeds; that the competition be open to school children.

The following resolution was moved by coun. Chapman for presentation at the Municipal Hall Convention.

Whereas the Municipal Hall premium has been excessively high, and Whereas farmers are gradually making private hail insurance, and whereas the paying of commissions of 2 per cent. and 3 per cent., and $2.00 per application with life insurance to secretaries of municipal councils, who are in receipt of good salaries paid by farmers to do the municipal business, is killing the Municipal Hail Insurance and causing much dissatisfaction; Therefore be it resolved that all commissions be taken off applicants' premiums, thereby lowering the cost of insurance and making it possible for farmers to again insure in Municipal Hail Insurance. Carried.

A letter was read from J. G. Vesnicke demanding payment of his account of $7.50 for fisher dogs and lynx.

Moved by coun. Chapman that payment of the account be refused. Carried.

It was decided to order six ounce of Bingo gopher poison, and 60 ounces of strychnine in ¼-ounce bottles, half of this for Delia and half for Craigmyle.

By-law No. 63, road appropriations, was read.

Moved by coun. Simpson that By-law No. 63 receive its three readings at this meeting. Carried unan:

By-law No. 63 having had its three readings, it was moved by coun. Simpson that this by-law be adopted as read. Carried.

It was decided that the new bridge for between Sections 15 and 16-35-17-4 was not necessary at this point at the present time, and it was moved by coun. McDonald that this bridge switched to Sec. 19-31-18-4 and Sec. 24-31-19-4. Carried.

Monthly financial statement was read.

Correspondence was read from H. P. Mitchell, Springwater School Fairs Association, Secretary Arrawanna School District.

Moved by coun. Chapman that accounts as presented be paid. Carried.

Meeting adjourned.

HAND HILLS ECHOES

We congratulate Mr. and Mrs. L. S. Flett on the birth of a daughter, born March 9th.

Mrs. R. Lindsay and little daughter Mary, were Calgary visitors last week.

There was a good time and a large crowd at Blair School dance held last Friday, March 8.

Mrs. George Innes was visiting with friends, at and near Fleming for a week.

There will be a masquerade dance at Blair School on March 22nd. Come one, come all!

F. L. McFadden was a Calgary visitor for a few days last week.

Oil Refineries Buy in Febraury

Increased oil production in the Turner Valley field is indicated by the amounts of naphtha and crude oil delivered to the Imperial Oil Refineries and the Regal Refinery in Calgary during the month of February. The former received 25,428 barrels of crude naphtha and 12,742 barrels of crude oil, while 6,318 barrels were delivered to the Regal plant. This volume represents an increase of nearly 3,000 barrels over the deliveries during the previous month.

Edmonton-Grande Prairie Linked by Air Service

Transportation from Edmonton to Grande Prairie has become a matter of a few hours with the inauguration during the past week of a commercial air service between these two points by the Commercial Airways Limited. The first flight of the service was made on Tuesday by Captain "Wop" May flying the Commercial Airways' new Lockheed-Vega plane. Leaving Edmonton at 9.05 a.m. Captain May and his passengers had lunch in Grande Prairie and reached Edmonton on the return flight at 5.15 p.m.

A suffering person is a sacred thing

Circle the Globe

—International Newsreel Photo.

1. The Fairchild cabin monoplane "City of New York" with her wings folded at Curtis Field, N.Y., prior to being hauled on a truck-and-trailer. 2. John H. Mears and Capt. R. Calder, his pilot, with the duplicate of the correspondence taken in the record flight around the world. 3. "The Empress of Russia," the plane in which Mears made his record flight. 4. Mears and his pilot plane "The City of New York" aboard. She was used by Mears in 1931 when he made his first world record.

Twice now, John Henry Mears has circled the world in record time. On each occasion the Canadian Pacific liner "Empress of Russia" has enabled him to beat all former records. Twenty-three days before his plane "The City of New York" landed at Curtiss field, L.I., Mears and his pilot, R. D. Calder, flew 700 miles out to sea and landed aboard the ship that conveyed him to France. Arrived in Europe, he flew from Cherbourg to Yokohama and boarded the "Empress of Russia" at Kobe, where the white liner waited ready to dash across the Pacific enabling him to hop across the continent in his plane and arrive at Battery Park, New York, 23 days, 15 hours, 31 minutes, and 3 seconds after he had left on his journey eastward. He sent the following telegram to Mr. R. B. Beaumont, of the Canadian Pacific Steamships at Montreal:—"Calder and I want to express our deep appreciation for the splendid cooperation we have received on our trip across the Pacific on the "Empress of Russia." Getting the ship in to Victoria Friday evening ahead of schedule saved us a day and we are deeply grateful."

The . . Appearance

of your printed stationery reflects the character of your business

If it's Printing we can do it

FIRST impressions are usually lasting, and you should no more think of representing your business with ill-arranged, poorly printed stationery than with an uncouth, inexperienced salesman. The psychological effect would be the same.

THE SNAP and vitality of our "distinctive" PRINTING registers instant approval. **Ask a user.**

SHIFT your printing troubles over to our shoulders—they are a burden to you—a pleasure to us.

General Motors News

Better than ever will be the Pontiac six that is to go on view for the first time in Canada at the Toronto and Montreal motor show. Details on this car not yet available, but it is heralded already as the Pontiac "Big Six". The factory promises that it will live fully up to the description, the intention being to initiate the owner of a low-priced six into advantages of power, speed and luxury hitherto enjoyed only by owners of higher priced models.

Particular interest attaches to this forthcoming new car announcement in view of the fact that Pontiac from the date of its introduction three years ago toppled all former sales records for a new make of car, and during the height of the past selling season outsold every other make of six-cylinder car in Canada. Thus its manufacturers inveheen able to incorporate in the "Big Six", to be announced shortly, features made possible only by astonishing volume economies.

Cognizant of this fact, experienced automobile buyers have watched with interest for the announcement. Promised as a "bigger, smarter, more powerful and more luxurious Pontiac, bringing big car features within the price range of the small car", this newest creation of the fast-growing Pontiac division of General Motors of Canada has given rise to many rumors and much speculation.

Thousands of dollars worth of new dies, tools, machines, testing gauge and similar items to build the new car are being installed in the Pontiac factories at Oshawa and Regina. Production of several parts for the new car is already under way, while other parts are being put into production as fast as equipment is made ready. Following the first Canadian showing at the Toronto Show, January 12-19th, cars will be placed on exhibition at dealer showrooms throughout the country as fast as dealers can be supplied with display models.

Alberta Farmer Named on Tariff Advisory Board

Hon. Jas. Robb, Dominion Minister of Finance, has announced the appointment of Frank S. Jacobs of DeWinton, Alberta, to the vacancy on the Tariff Advisory Board to succeed Hon. T. G. McKenzie who resigned some time ago to enter the provincial government of Manitoba. Mr. Jacobs is a farmer and a former editor of the Farm and Ranch Review, Calgary.

The face is the index of the mind.

Massey-Harris Company

Spring is approaching very rapidly. You will soon need some new machines for your Spring and Summer work. We invite you to come in and examine our goods. The Wallis Certified Tractor develops more power for more years, at less cost than any other tractor approaching it in weight and piston displacement. The Massey-Harris all-steel Drill, centre feed delivery, drops the grain in the bottom of the furrow.

Our **No. 6A Engine Gang Plow** is stronger and has more clearance than any plow on the market. Has patented bottoms.

Canadian Boys From Leading Public Schools To Visit Great Britain

Montreal.—Following a custom inaugurated last year, a party of Canadian schoolboys representing the leading public schools in the Dominion, will visit Great Britain this summer under the auspices of the Oxford and Cambridge Empire Tours Committee and under the personal direction of Rev. E. S. Fellowes-Farrow, M.A., F.R.G.S., of Cambridge University, assisted by a staff of Oxford and Cambridge men.

Canadian schools represented in the 1928 party were: Bishop's College School, Lennoxville; Trinity College School, Windsor; Lower Canada College, Montreal; Upper Canada College, Toronto; and Brentwood College, Victoria.

The object of the tour is to bring together the youth of Great Britain and Canada during the formative years of school life and to encourage them to understand the points of view of one another by means of personal contact with a view to making them realize more acutely that they are a part of the British Empire.

Last year the boys were received by the Lord Mayor of London, and were welcomed most enthusiastically wherever they went; this year it is anticipated that the welcome will be even more fervent.

The party will sail from Montreal on July 6, on the White Star liner "Laurentic."

Propose Increase In British Preference

Sub-Amendment To Budget Has Been Moved In House

Ottawa.—A sub-amendment to the budget urging upon the government "the consideration of an immediate and substantial increase in the British preference as a step toward freer trade relations between Canada and other nations was moved in the House of Commons by H. E. Spencer (U.F.A., Battle River). The amendment was seconded by A. A. Heaps (Labor, Winnipeg North).

Consequently, the house now has before it the main motion of Hon. James A. Robb, minister of finance, the amendment moved by Hugh Guthrie, which regrets that there is no provision in the budget for safeguarding the house urged in agriculture and industry, and the present sub-amendment.

Approves Crossing Expenses

Ottawa.—The clause in the bill amending the Railway act which would provide that the $2,000,000 a year grant to assist in protecting railway crossings be continued, was recommended by the railway committee of the House of Commons. In the past 20 years $4,000,000 has been provided for the purpose and only slightly over $2,000,000 has been used. Some $1,900,000 still remains in the fund.

Celebrates Eightieth Birthday

London, England.—The Duke of Wellington, fourth holder of the title granted to the distinguished soldier celebrated his 80th birthday anniversary, March 15. By virtue of the distinctions granted the "Iron Duke," the present holder probably holds more foreign titles than any other English nobleman.

Will Hold National Convention

Montreal.—A national convention for the purpose of advertising Canada, will be held in Montreal this summer. Representatives from all tourist, convention and public bureaus in the Dominion as well as provincial and dominion government representatives will be invited to attend.

Seclusion Is Voluntary

Constantinople.—Seclusion of Leon Trotsky, exiled former Soviet war chief, has become voluntary, the Soviet guards who have been watching his activities have been withdrawn since his removal to a hotel at Pera, from the Soviet consulate there and apparently he is free to go about as he will.

Was Hero Of Gallipoli

London, England.—General Sir Charles Newsham, who at an advanced age, served in the Gallipoli and Saloniki defences and was slightly wounded and mentioned in despatches, is dead at the age of 64 years. He retired in 1924.

Noble's Resignation Accepted

London, England.—The Exchange Telegraph Company says it had been officially announced at Rome that General Umberto Nobile, commander of the ill-fated Italia expedition, had resigned his rank and office. The resignation was accepted.

Bridgeman To Retire

London, England.—W. C. Bridgeman, first lord of the Admiralty, has announced his retirement from office at the end of the present session of Parliament and that he will not seek re-election to Parliament.

Wants Canada To Develop Helium Gas

Opposition Obtaining Gas Here Concessionaire Urges Action

London, England.—Development of helium gas for use in airships in Canada is a possible development of the future of the giant dirigibles for trans-oceanic transport by the British air ministry, Sir Samuel Hoare, air secretary, intimated in the House of Commons. He said it was hoped to approach the Canadian government later to see whether it would be possible to produce helium in Canada as the gas is produced and sent extensively in the United States.

The two airships, he hoped, would be ready to take the air by spring or early summer.

If the home tests are successful it is proposed to make a flight to Egypt and India, and then to Montreal.

Toronto. — Large quantities of helium gas can be produced from the gas wells of the Bow River Valley of Alberta, to the south of Medicine Hat. The production of helium in commercial quantities has not been accomplished in Canada during the war as a result of researches made by Prof. J. C. McLennan, of the University of Toronto.

Helium is non-inflammable and though less buoyant than hydrogen, is much safer.

Will Not Race Again

Seagrave Announces That He Has Definitely Retired

Daytona Beach, Fla.—Major H. O. D. Seagrave, British racing driver who set a new world's speed record of 231.36 miles an hour here, declared he definitely had retired from automobile racing.

Major Seagrave said he will return to England after competing in the Bonneville speed trials at Muroc, and will devote himself to the cement business. He will continue to engage in power boat racing as a hobby.

The "Golden Arrow," specially designed for super-speed racing, will be taken to New York for exhibition before it is transported to England to be placed in a museum.

Wins McKee Trophy

Award For Meritorious Service Given To Western Air Ace

Ottawa.—Captain C. H. "Punch" Dickens, commercial pilot of Edmonton, Alta., has received the McKee trophy award for 1928, for meritorious service in the advancement of aviation in Canada during the twelve months he spent a total of 1,035 hours in the air, a remarkable achievement when consideration is taken of the fact that the revenue performed most of its duty in the northern sections of the Dominion.

The presentation of the award was made by Colonel J. L. Ralston, minister of national defence.

Wants Treaty Signed

U.S. Senator Urges Regulation Of Sockeye Salmon Catch On Pacific

Washington. — The treaty between Canada and the United States to regulate the catch of sockeye salmon on the Pacific coast was brought to the notice of President Hoover and Secretary of State Kellogg again by Senator Wesley Jones, of Seattle. Senator Jones hopes to get the treaty signed before Secretary Kellogg leaves office. He also hopes to get the treaty on the calendar of the special session of the senate beginning April 15 next.

Innovation For Moscow

Moscow.—The Red cross award will soon have its first moving stairways, an innovation that makes Soviet patriots proud of their modernization. The stairways will be in a new building for the Central Co-operative Organizations (Centrosoyus) here, built according to the plans of the well-known French architect, Le Corbuzier, who is now in Moscow.

Oppose National Flag

Winnipeg. — The proposal to authorize a new national flag for Canada was vigorously opposed by delegates to the annual convention of the Grand Orange Lodge, of Manitoba, in session here, who passed a resolution opposing the enactment, and also opposing the extension of bilingualism, particularly in Manitoba was passed.

Scientist Dodges Publicity

Berlin.—Prof. Arthur Einstein and Mrs. Einstein left Berlin to avoid publicity on the famous scientist's birthday. He was 50 years old on March 14. They went to an unnamed country place for a short visit.

Russian Miners Killed

Moscow. — Twenty-seven miners were killed when a crowded cage fell in a shaft near Gorlovka, in the Donetz coal basin.

Estimates For British Air Force Criticized

Kellogg Pact Has Not Changed Policy, Says Labor Member

London, England.—Joseph M. Kenworthy, Laborite member of the House of Commons, bitterly criticized the British Government in debate upon the 1929 estimates for the air force. He said the government's estimates bore no trace of any change in policy since Britain signed the Kellogg anti-war treaty.

Kenworthy criticized the "enormous cost" of the air station at Singapore and also the utilization there of young airmen and "expensively trained cadets."

"I could have understood it two or three years ago, before the signature of Great Britain was affixed to the Kellogg anti-war pact," he said.

A total of $2,500,000, a fifth of which is to be spent this year, was said, is to be devoted to the Singapore station.

"If the station is merely for defence of a new dockyard, that is an extraordinarily large sum," he said.

Sir Samuel Hoare, secretary for air, replied that the expense is part of the general expenditure at the Singapore base, and that Singapore is the best place for handling the aerial side of any operations of the naval base.

"Even if there were no naval base at Singapore, the air base would be necessary" Sir Samuel said, "as it is the cardinal point of our communications."

HOUSE PASSES BILL FOR C.P.R. BRANCH LINES

Ottawa. — The Canadian Pacific Railway act for branch line extensions completed its passage in the House of Commons, when it was given third reading. The bill emerges intact, with the exception that the proposed Sutherland-to-Melfort line in Saskatchewan was eliminated in the numerous committee. The bill now goes to the senate.

The measure authorizing the Canadian National branch line developments still stand for third reading on the order paper in the commons. The bills have been held up on account of the C.P.R. bill, but will likely soon be accepted and also passed on to the senate.

The C.P.R. bill, during a private one, came up during the hour in the house set aside for private members' bills. It passed with little or no discussion.

The house very quickly gave third reading to the bill which will incorporate Barclays Bank (Canada) without amendment.

Many Applications For Assisted Passage

Approval Given Large Percentage Of Prospective Settlers

London, England.—In the thirteen weeks ending January 31, 1929, 6,583 families and 28,468 individuals not included in families applied for assisted passage to Canada. Right Hon. L. C. M. S. Amery, secretary of state for the Dominions, told the House of Commons. Of these, 2,712 families and 11,149 individuals had been approved and 2,140 families, and 15,381 individuals had sailed for Canada. These figures did not include the special scheme under which the party of British miners went to Canada as harvesters.

Frove King Is Recovering

London, England.—The papers are giving great prominence to the first photographs of King George, taken since his arrival at Craigwell House. They show His Majesty seated in a bath chair in the grounds with Queen Mary standing beside him. The photographs lend confirmation to recent reports of the King's favorable progress toward recovery.

"THE TEN-POUND SMILE"

A happy group of Britishers who have just arrived in Canada under the new ten-pound fare, asked for comments as to the possible movement under this reduced rate, officials of the Department of Colonization and Development, Canadian Pacific Railway, say: "While we are hopeful, of course, that, consistent with the needs of the Dominion, many will take advantage of the opportunity afforded by the new rate, it is far too soon to state that much may be expected. Indeed there are indications that, apart from the first stimulus arising from the novelty of a new rate, the majority taking advantage of it are not looking for agricultural opportunities, and cannot therefore be readily placed through existing colonization organizations. The movement as a whole, therefore, may prove to be disappointing."

SHOWS RECORD SURPLUS

Hon. James A Robb, minister of finance, who introduced the budget in the House of Commons, on March 1. In which he trimmed down taxes, reduced debt and revealed a record surplus of $60,782,000.

Expect To Complete Railway In April

Line To Churchill Being Steadily Pushed Onward

Winnipeg.—Within sight of the sea, steel laying workers are pushing steadily onward to Fort Churchill, terminus of the Hudson Bay Railway, and early in April, unless the unforseen occurs, will have completed their work.

Telegraph communication with Churchill was established for the first time on March 12, and steel is now within 12 miles of the port, stated H. A. Dixon, regional chief engineer of the Canadian National Railways, here. Construction material for work at the port already is en route north.

Heavy Snow In Colorado

Two-Day Storm Isolated Small Towns Near Denver

Denver, Colo.—Small towns and villages in the Rocky Mountain region were marooned by snow that covered highways to a depth of three feet in places, following a two-day storm.

The storm area extended northward to the Canadian border, spreading a white blanket over Montana, Colorado and Wyoming.

A group of high school boys rescued Nelson, 71, from the cabin near Mount Almagre, fifteen miles from the famous Cripple Creek mining district of Colorado, where he had been marooned without food.

The Disarmament Question

Britain and U.S. Must Agree In Matter Says Balfour

Buffalo.—The question of Anglo-American relations overshadows all other political topics in the interests of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We feel, in England," he said, "that the our two countries can work in agreement, the cause of disarmament is lost. We will lose the respect of continental powers and another war is on the way."

Britain To Build Cruisers

London, England.—Three new cruisers will be laid down during the coming financial year, W. C. Bridgeman, first lord of the admiralty, told the House of Commons in introducing naval estimates. The design of one cruiser has not yet been settled, but the other two will be smaller type cruisers with six-inch guns destined to replace other smaller cruisers which are becoming obsolete.

English Sextet Wins

London, England.—In an international ice hockey match at Richmond Rink, England defeated Switzerland by 8 goals to 3.

Britain Plans Second Imperial Air Line

Will Link Capetown With London Says Air Minister

London, England. — Arrangements have been concluded for a second great Imperial air transit line, the two being approximately the same distance and being thus far the longest regular services in the world.

Sir Samuel Hoare, air minister, announced in the House that arrangements have been concluded for a service between London and Capetown. A service between England and India, also approximately 6,000 miles, has been operating for some time, a provisional time table having been issued for this some weeks ago.

Negotiations between the various African governments, particularly the Union of South Africa, for inception of a weekly air service between London and Capetown have been brought to a successful conclusion, the air minister announced.

Fire Sweeps Loadon Factories

Heavy Loss In District Occupied By Paper Houses

London, England.—The biggest fire that London has experienced in a long time caused heavy damage on the south shore of the Thames in a district occupied by paper and ink factories. Three hours after the first alarm, flames were shooting 100 feet into the air, a whole series of the factories being ablaze.

A large part of London was illuminated by the blaze. Scores of fire engines and hundreds of firemen were trying to prevent further spread of the conflagration. They managed to save the offices and neighboring workmen's homes, although the families fled.

No loss of life in the fire was 400 tons of newsprint paper.

Want Police Force Similar To Mounties

Idea Suggested To President Hoover To Stop Smuggling

Washington.—A federal constabulary, similar to the celebrated Royal Canadian Mounted Police, has been suggested to President Hoover as a means of ending liquor smuggling across the Canadian and Mexican borders.

The constabulary would deal not only with rum running, but also with immigration smuggling, and the ordinary run of merchandise smuggling operations now under the eyes of the customs service.

Pilot Has Freak Accident

British Airman Had Propeller Shattered In Encounter With Hawk

Chico, Calif.—Victim of a freak accident, Flying Cadet R. G. Hamilton, R.F.C., was forced to land in a ploughed field near Cana, six miles north of here, with the propeller of his pursuit plane shattered as the result of an aerial encounter with a hawk.

Cadet Hamilton, attached to the British airplane carrier, H.M.S. Hermes, now at San Diego, was flying from that city to Vancouver, when the freak accident occurred.

BRITAIN HAS NEW SCHEME TO HELP SETTLERS

Ottawa.—A new assisted passage scheme to provide Canadian farmers with British workers has been announced by the Department of Immigration. Young men in the British Isles who have not been able to find the present £10 steamship fare, are to be recruited and selected only by Canadian immigration authorities will be lent their passage money by the British government. The movement will start with 1,000 families is expected, and several thousand men will probably be brought out this year.

The proposal announced will embrace a limited number of unemployed miners, physically fit, but not necessarily of the skilled farmer class, who come under the present assisted passage scheme.

A survey of the various provinces is at present being conducted by the department and the number of men to be assisted will depend upon the demand for agricultural workers.

The new scheme is explained to be quite different from the miner-harvester scheme of last year. The men first demonstrate a desire to settle permanently in this country, and no provision is made to provide return fares at the end of the harvest. None of the expense is to be borne by the Canadian Government.

While applicants need not have farm experience, they will be carefully chosen with regard to physical fitness and willingness to accommodate themselves to conditions.

The new program is to be supplementary to the various assisted passage schemes already in effect. The most important of these is the £2 steamship rate for agricultural families, with free passage for children.

Alberta Government To Complete Provincial Gravelled Highways

Auto Driver Killed Trying For Record

Machine Out Of Control Crashed Into Sand Dunes

Ocean Speedway, Daytona Beach, Fla.—Lee Bible, 42-year-old Daytona Beach garage mechanic, rode to a spectacular death in the 36-cylinder racing car with which he was vainly attempting to break the world's speed record of 231 miles an hour, made by Major H. O. D. Seagrave, of England. Speeding at more than three miles a minute, the machine got beyond his control and crashed into the sand dunes, striking and killing also Charles Traub, a newsreel cameraman. Bible left a wife and two children.

The accident, one of the most tragic in the history of beach racing here, occurred just after Bible crossed the measured mile course at a speed of 202 miles an hour, and was witnessed by a crowd of approximately 20,000 spectators who lined the sand dunes for miles.

To Fight "Red" Menace

Manitoba Command Canadian Legion Asks Action Against Communists

Winnipeg.—Eradication of Communism from Canada and the prosecution of those responsible for its spread, was demanded in a resolution unanimously adopted at the fourth annual convention of the Manitoba command, Canadian Legion, British Empire Service League.

The convention also urged that the Communists be prohibited from holding meetings in public schools halls and the newly-arrived immigrant. Communist ideals were being circulated in literature and songs "grossly offensive to Christians, and contrary to the teachings of Christianity."

They would "demoralize youths and would lead to ultimate bloodshed, revolution and the breaking down of all religious and civil authority."

Radiogram Received From the Antarctic

Welsh Society Of Saskatoon Gets Message From Scientist With Byrd Expedition

Saskatoon.—A radiogram from the Antarctic, received by mail by the New York Times, has been received by Thomas Phillips, Saskatoon, from Frank Davies, a welsh boy, which wishes the Saskatoon Welsh Society a joyous reunion for 1929.

Frank Davies, at one time an instructor on the University staff here, and now a scientist with Commander Richard E. Byrd, in his expedition to the South Pole, sent the message on February 28 from "Little America," Antarctica, and it was received by Mr. Phillips, who is the date for the local celebration, which took place March 1. The document will nevertheless, form a valuable item in the archives of the Welsh Society in Saskatoon.

Flus National Apple Week

Ottawa.—Decision to arrange for the observation of national apple week during the present year was reached at the concluding session here of the horticulture council of Canada's annual convention. A definite date for the event was not set. J. H. Lavole, of Quebec City, was installed as president for 1929. Thomas A. Briel, of Nakusp, B.C. is a director.

Famine In Uganda

London, England.—A dispatch from Kampala, Uganda ,to the London Daily News, reports thousands of persons dying of famine in Belgian Uganda. Motorists saw hundreds dying on the roads attempting to cross the border into British Uganda, the dispatch said.

Edmonton, Alta.—The province of Alberta plans to expend a total of at least $10,000,000 on improving roads within the next three years, so Hon. C. L. McPherson, minister of public works, told a deputation from the Alberta Motor Association which interviewed the government recently.

Of this huge sum, during the year 1929, said the minister, the government will spend the sum of $4,547,-633 out of capital and income accounts. This figure, however, includes interest and sinking fund charges on previous capital expenditures.

The expenditure for 1929 will cover the complete gravelling of three main highways from Central Alberta west to the Saskatchewan border. Of these three main highways, one of them, the gravelled road leading east from Calgary through Bassano, Medicine Hat, and on to Walsh, on the Saskatchewan border, will continue the trans-provincial highway clear across the province.

Thus, this main gravelled highway will extened from the Saskatchewan border through Medicine Hat, Bassano and Calgary, linking up with the gravelled highway to Banff.

Telephone Service Increased

Hundred Line Extension Has Been Completed At The Pas

The Pas, Man.—It was announced by R. Coddington, commercial superintendent of the Manitoba Telephone system, that arrangements for another hundred line extension on the exchange at The Pas exchange are complete.

"When we took the plant over last July, we had 597 subscribers," said Mr. Coddington. "Today we have 895, and it looks as if we will go over the 900 mark within the next two months.

"We intend to extend the long distance facilities north to Flin Flon during the present season so that we have set aside $19,000 for this work."

Mr. Coddington said that the long distance business originating in The Pas was far beyond expectations.

Rifle Meet Date Set

Will Be Held During Week Of August Twelfth

Ottawa.—The D.R.A., the annual prize meet of the Dominion of Canada Rifle Association, will be held this year during the week of August 12. The dates for this historic event, which attracts the foremost marksmen of all the provinces of the Canadian Rifle Ranges, just outside the capital, were decided by the executive, following the annual meeting of the association here.

Brigadier-General J. Duff Stuart, of Vancouver, is the association's new president. Brigadier-General A. D. Ross, of Montreal, whom he succeeds, was created a life governor of the body.

Secretary To Trade Minister Honored

H. O. Campney Leaving Government Service To Practice Law In Vancouver

Ottawa.—A complimentary dinner was tendered by the department of the Parliament Buildings to H. O. Campney, who for a number of years has been private secretary to Hon. James Malcolm, minister of trade and commerce. Mr. Campney is leaving the government service to practice law in Vancouver. Members of the parliamentary press gallery and the department of trade and commerce attended. E. W. Grange presided.

Left Large Estate

Toronto.—William Kellaher, executor of Toronto, who died recently at the age of 83 years, left an estate valued at approximately $200,-000. Mr. Kellaher, who arrived in Toronto penniless more than 60 years ago, willed $150,000 to local orphanages.

Aberdeen-Angus Breeders Favor Proposal For Cattlemen's Association

Brandon, Man.- Co-operation of the several Stock Breeders' Associations throughout the Dominion in the forming of a "Canadian Beef Cattle Men's Association" will be sought by the Canadian Aberdeen Angus Association.

A resolution proposing the organization of a Canadian Beef Cattle Men's Association was adopted at the annual meeting of the Aberdeen Angus members here. The purpose of the association would be to support and do promotional work in connection with the beef grading system that has been established by the Dominion government. The resolution was sponsored by Hon. J. D. McGregor, lieutenant-governor of Manitoba.

Under the resolution, the Dominion Shorthorn Breeders' Association; the Canadian Hereford Breeders' Association, the Saskatchewan and Alberta Stock Growers' Associations will be asked to co-operate with the Aberdeen Angus Association in the formation of the new association.

Lieutenant-Governor McGregor and James Bowman, Guelph, Ont., were elected yesterday with F. H. Reed, Lacombe, Alta., president, and W. J. F. Warren, Belbeck, Sask., vice-president.

Parent Education

Teaching Grown-Ups How To Become Successful Parents

One is so accustomed to hearing about the education of children that it now comes almost as a shock to learn that adult Winnipeg has taken a new branch of study, known as "Parent Education."

Popular lectures form the "classes" to which daddies and mothers come as pupils. And they have "homework" too, the most interesting kind of homework, for it consists of trying out on their own offspring, the lessons they learned at "school." And the sole and only purpose of that school is to teach them how to become successful parents.

"And why not?" demanded an official of the Winnipeg Health League, when asked about it. "In this age of specialization, when a professional man has to study six or seven years before beginning to practise, why shouldn't there be some specific training available for those who take on one of the most important duties in society—that of parenthood?"

"We want to teach people simple, sound, common-sense things about children and health; foolish to understand, or complicated. Just the good bread-and-butter facts that parents should know if Canada of the next generation are to be as healthy mentally, mentally and physically as it is possible to make them."

Premier Bracken from time to time have expressed themselves very strongly upon this theme. A symposium of their writings about that trend of opinion amongst thinking people is emphatically in support of the idea.

Judge H. S. Mott, of the Juvenile Court, Toronto, says: "Parents are very much in need of assistance in parent craft. I think it should start before marriage."

Judge Emily Murphy: "Educate parents if you can. It should be attempted by all means.

The Most Reverend Archbishop Neil McNeil, Toronto: "A knowledge of the duties of parents and the way of treating children should begin at the time of marriage."

Dr. Margaret Patterson, Judge of Women's Court, Toronto: "There is no question regarding parent education. It should start with the grandparents when possible, but certainly with the parents as children."

Dr. James L. Hughes, former chief inspector of schools, Toronto, believes that parent education should start in high school. "The best thing I can suggest," he says, "is the preparation of a book on true child development and the passing of a law that the groom in each marriage should produce the book as his wedding gift to his bride on the title page."

Hon. L. A. David, Quebec: "I believe that parental education should start before marriage."

Hon. William F. Roberts, M.D., former Minister of Health for New Brunswick: "Yes, at twelve years of age."

Judge J. P. McKinley, of the Ottawa Juvenile Court, agrees that parent education should start at twelve.

Professor Peter Sandiford says, that every parent should be a child psychologist. "Seventy years ago Spencer pointed out that we trained people as if they were never to be the parents of children," he says.

Lepers Are Long Lived

Longevity of lepers is shown in a report submitted by the territorial board of health to the Governor of Hawaii. Of 322 lepers at Kalaupapa settlement, 6 men have lived those from forty to forty-nine years; thirty from thirty to thirty-nine years; thirty-six from forty to forty-nine years, and 131 from ten to nineteen years. Infrequency of leprosy among members of the white race is also indicated.

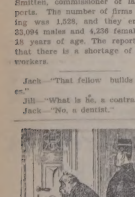
Alberta Industries

Alberta industries paid out $44,- 291,000 in wages in 1928, so Walter Smitten, commissioner of labor reports. The number of firms operating was 1,928, and they employed 35,094 males and 4,236 females over 18 years of age. The report states that there is a shortage of women workers.

Jack—"That fellow builds bridges."

Jill—"What is he, a contractor?"

Jack—"No, a dentist.



Anderson returns to an "Inebriates' Home" drunk.

Warder: "You will be punished for being drunk."

Andersen: "How was I to guess that you had to return to an 'Inebriates' Home' sober?"—Karikaturen, Oslo.

Would Abolish Revolver

American Prison Association Believes It Would Lessen Crime

The American Prison Association, which has many Canadian members, has been holding a convention recently in Kansas City and has resolved among other things that "the A.P.A. strongly recommends the abolition of the revolver, except in time of war," and called upon the state legislature to pass laws making it illegal to manufacture, sell, distribute, or have in one's possession any firearm with a barrel measuring less than 26 inches.

The resolution is supported by the customary whereases, one of which states that many crimes would not have been committed if the perpetrators had not had a revolver handy, and further that "it has been demonstrated that fingerprints and evidence that the possession of a revolver by law enforcement officers is not indispensable to maintenance of law and order."

The association apparently takes no notice of the needs of the writers of detective fiction, or still more important, those of scenario projectors. One would gather from the undeniable evidence of the screen that in the whole of the civilized world and in every well-regulated home reposes a loaded revolver. It is going to be awkward if "they make a law."

As it is in Canada, persons must have a permit to number revolvers among their possessions. The police may carry them at night, but it is not charged that they are careless in the use of them.

Certainly the first whereas of the association is the strongest, but it is an open question whether such prohibition as that suggested would dispossess those intent upon crime of the weapon. It might—very illicitly it would—work with those just starting in that line of accomplishment with a strong administration of the permit system. Unless the manufacture and importation over the whole continent or several continents in criminal intent upon preying upon society could and would secure his weapons without much difficulty. Its meeting this year in the autumn in Toronto. General W. S. Hughes, superintendent of Penitentiaries Ottawa, was one of the speakers at the Kansas City meeting and, judging from the report of the paucity of Canadian accomplices there both personally and by his presentation of the Canadian system.

Many Words Borrowed

Language Spoken In Garage Composed Of Many Tongues

Britain has borrowed many foreign words to make up its oddly composite language. Each year a collection of words is dubbed and incorporated in the up-to-date dictionaries, says an article in Pearson's Weekly.

There are a good many languages spoken in the garage, though the foreign words have passed into the English vocabulary.

"Garage" itself is French and comes from garer, to make safe. It should, which should be a stable of old days, a turret or watch-tower, and with garrison. Garage, in France, is used in connection with shunting on the railways.

The word "motor" is, of course, from the Latin moveo, to move, like the better known emotion.

The "engine" implies ingenuity — both words are from the Latin ingenium, meaning wit, and skill and natural ability.

"Chassis" is French from chasse — which also gave us chase, window sash, or shash, as it used to be spelled, and the meaning is a frame.

"Tire," suggests at once, and properly, attire. This word for the cover covering of the wheel comes from the French tirer, to put on or off, to tighten; there are many kindred meanings.

"Jack" is literally a Jack-of-all-trades word. It is a diminutive of John, and was applied to contrivances replacing a servant, as in bootjack, or the mechanical device which elevates and lowers the table.

"Brake" remains rather mysterious—it is probably a survival of an old word for carts or bridle, and so something ready to stop.

"Steering" takes us back to the Anglo-Saxon steor, more particularly the rudder of a ship. "Wheel" is also from the language of our forefathers.

An Eye To Business

She was considered to be a very businesslike woman, and when she married a wealthy city merchant many doubts and wings were exchanged in the neighborhood.

Shortly after the honeymoon her husband was killed in a street disaster, and the young wife telegraphed the news to her parents in the province: "John killed in street accident today," ran the telegram. "Loss fully covered by insurance—Gerty."

"So you are going to emigrate to Australia! What do you mean to do there?"

"Take up land."

"Much?"

"A shovelful at a time, to start with, I expect.

Needs Many Assistants

Cleaning Boots In Large British Hotels Is Big Job

The superintendent of the boots in a British hotel has a big job on his hands, and has a quite a corps of assistants. In the busy season he may be responsible for the cleaning of two or three thousand pairs a day.

It is no uncommon thing for a wealthy couple to arrive at a fashionable hotel from the Continent, with their boot-trunks crammed with various types of footwear.

All kinds and colors! Grey boots, green boots, bronze boots and boots in delicate shades of mauve and boiled-rose that must be handled with extreme care! Boots and shoes of shark skin, of alligator skin, of snake skin, of lizard skin, and — most expensive of all—boots made from the beautifully mottled hide of the sea leopard.

For the proper treatment of all these triumphs of the shoemaker's art the Master of the Boots is responsible. His is the task of selecting the tinted chalks, creams and varnishes, and of seeing that they are used correctly.

Long experience has made him an artist in colors. His fawns and greys and drabs are not the same shade as the original, his blues and greens are the proper brightness.

His work goes on about ten o'clock, and goes on all through the night. Only hand labor is employed, and each one of the many pairs of boots and shoes that leave the hotel during a period passes through five or six pairs of hands before finally being left upstairs by the floor valets, to be deposited outside the doors of their owners.

In Memory Of General Wolfe

Canadian People To Place Statue In Greenwich Park, London, England

Down in the archives at Ottawa there is a pair of baby shoes marked as once the proud property of a tiny boy who grew to be General Wolfe. A handsome memorial to this man who paid for his fame with his life and died on the victorious cliffs on the Plaine of Abraham, the possessor of curious charabanc lords of tourists.

Mostly these tourists are from across the border. It is all in the day's travel with them. But it is a different thing with the Canadians who fall into reveries there as they see with their physical eyes the actual cove, the actual heights, that spelled for them another no matter how other history lessons have faded. By the same token Canadian visitors to Westminster Abbey seek out Wolfe's memorial there.

Now there is to be added another memorial, the gift of the Canadian people a statue is to be placed in Greenwich Park, London, England. It is said the first rejoicings over Wolfe's victory were much keener in New England than across the sea. To those in Great Britain Canada was then little known and less regarded, but the American Colonies knew her as a neighbor. Canada today, which should be a young Country the memory of a famous son, whose name is written in the destiny of half a continent.

Down through history and on to the end of recorded time have wandered and will wander the pair of baby shoes.—Free Press.

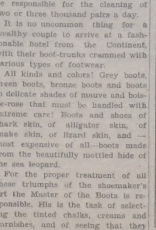
Millions For Newspaper Space

Louis Wiley, business manager of the New York Times, gives some interesting figures in regard to advertising. Last year while $25,000,000 was spent for radio, $71,000,000 for outdoor publicity, and $177,000,000 in magazine publications, $300,000,- 000 for direct mail advertising, no less than $800,000 was paid for newspaper space. These are striking figures, and show the trend of the times.

Chose Rose As Emblem

Alberta Women's Institute recently circularized the schools, and asked the children to take a vote on the choice o a provincial flower. The majority chose the wild rose. The Institutes will take steps to have this made the official provincial flower.

Pipa tsade, which have recently arrived at the London Zoo from South America, are so thin that one can see through them.



Broke Record

Frank Dupuis established a world record but lost the race. He established his record when on the first day he covered the initial 41 mile lap of the Eastern International Dog Sled Derby at Quebec, in 3 hours, 32 minutes, 42 seconds. On the two succeeding days, however, Seppala, veteran Alaskan musher, succeeded in overtaking the lead and carried off the honors, but Dupuis' time for the first day has never been excelled.

New Table Delicacy

Australians Have Discovered That Whale Meat Is Edible

Australia is beginning to realize that it has been passing up a valuable food resource by its failure to utilize whale meat, and Sydney stores are now displaying whale meat as a table delicacy for the first time.

Reports from Antarctic indicating that Commander Richard Byrd was having large quantities of whale meat packed for use on his expedition during the winter, played a part in awakening Australians to the fact that whales are edible.

Whales, although living in a watery environment are not fish, but are warm blooded mammals. The meat is red and has very much the same form and consistency of beef. The meat is not oily, as one would naturally imagine, the oil being separately contained in the great masses of blubber and connective tissue underlying the skin. What is looked upon commercially as the edible meat for human consumption is that taken from the vast muscles lying along each side of the whale's tail.

New Settlers Open Big Area

Tremendous Development Taking Place In Western Canada

Indicative of the tremendous development which has taken place in Western Canada, and the large part being played by incoming settlers in that development, the land settlement officials of the Canadian National Railways in the west estimate that the total amount of new land broken and prepared for crop during 1928, in the territory tributary to the National lines, was 700,000 acres, compared with about 500,000 acres in 1927. In addition to this, some 200,000 acres was cleared of brush and prepared for breaking during the coming season. The significant feature of this increased farm development is that most of the new land was broken by incoming settlers, recruited and directed to locations by the Colonization Department of the Railway Company.

Claim Oldest Parking Law

Kingston claims to have the oldest "vehicle-parking" bylaw in Ontario. In the latter part of 1816 the magistrates who governed the place decreed "that carts and carriages left in the streets shall be arranged along the sides in regular manner, on a penalty of five shillings." No one was allowed to race or run horses on the street, on penalty of five shillings.

Rastus—Boy, why yo' say I'se cheating at this game of kyards?

Sam—Kase I know exactly what kyards I done deal you.

Sea Floor Is Treasure House

No Doubt Many Valuable Things Dropped From Liners

Few landsmen realize that there are roads and lanes on the sea, as clearly defined and consistently used as those on land. These "sea-lanes" are steamed over by thousands of ships each year and would disclose some interesting stories.

After the coming of steam and the inauguration of definitely planned routes east and west, the cinders and ashes, broken crockery, old iron, unneeded ballast and all the rubish that is thrown overboard, must have begun to pile up along the three thousand miles of ocean floor.

On all coal-burning ships ashes are dumped overboard each "watch"—that is, every four hours, but the increasing use of oil fuel is lessening the amount of cinders that go overboard each day.

Clinkers and ashes are not the only things that are dumped. Tons and tons there in millions, broken fire-bars by the ton, cleats, bolts, martingales and tools in thousands. Yet these must be outnumbered by the glasses—hundreds unbroken and accidentally dumped—and millions of pieces that are the result of everyday shipboard carelessness, such as wholesale smashing during a sudden storm.

Perhaps, too, among the glistening china or the twinkling glass that are lying on their bed of cinders, we might be lucky enough to find a ring, bracelet or necklace dropped overboard by some luckless passenger. What a treasure house—if only we could explore it!

Cod Liver Oil For Ailing Hens

Mixed In Wet Mash Each Day, It Proved Its Efficiency

Compared with yellow corn, barley proved a poor substitute in the feeding of laying pullets at the Lethbridge, Alberta, Experimental Station. These foods were given as part of a general ration to pens treated in other respects alike. After a few weeks feeding the barley-fed birds commenced to appear unthrifty, and a number of birds died. The first much resorted remedy for the affliction of this trouble was observed in the corn-fed pens although no precautions to the safety of the birds were from being exposed to infection from the other pens. The director of the station, Mr. W. H. Fairfield, in his report for 1927, informed by the Department of Agriculture, at Ottawa, believes the trouble was due to a deficiency of vitamin D in the barley ration. By the beginning of March, most of the birds in the barley-fed pens were sick and high mortality was the result. It was decided to try feeding cod liver oil, which was given at the rate of one-quarter of an ounce per bird, or about 60 per bird in the wet mash each day. Within two weeks after the feeding of the cod liver oil was commenced, all the pullets had become thrifty, production soon returned to normal and with the exception of a few dead swollen, no indication of the former trouble was observed.

Problem For Railway Men

How To Determine Age Of Children For The Transit At Half Fare Rate

British railways have just raised the age at which children will be carried at half fare from 12 to 14 years. A correspondent of the staff magazine of the Great Western Railway writes: "Sir, I submit that whilst in the case of males this will entail no more difficulty than before, in the case of females there arises a serious question, viz., how is one to discriminate with a female of 13½ from one of any age upward to about 45? What between bobbed hair and bobbed skirts, and the freedom of youth supplied by cosmetic, this is rapidly become a great difficulty, to say nothing of embarrassment.

"If I foresee the time when grandma, age about 45, sidles up to a booking office and in a plaintive, small voice asks for a half-ticket to 'Somewhere-on-Sea,' and gets it."

Metropolis Of the Orient

The phenomenal growth of Shanghai during the past two decades, making it the New York, Paris and Chicago of the Far East, warrants the prophecy that it is destined to become, during the next few decades, one of the most populous of all world cities.

"Have your heard that your friend Moyle has become rich at a single stroke?"

No. How did it happen?"

"His rich uncle had it."

Fair One—"And so you hiked from Vancouver to Miama in three months?"

Bored One—"Yes; I should have made it in two months, but I had to walk ten miles."

He: I suppose I'm only a pebble on the beach of your life?

She: That's true, but you might stand a chance if you were a little smaller.

A piece of gum camphor placed inside a piano will keep moths away.

How Sweet

The chief confectioner of the Canadian Pacific Liner "Empress of Scotland," decorated the buffet of that ship's dining saloon, by making a scale model of the 25,000 ton ship entirely of sugar. Lights shine through the portholes, at the masthesds and the green and red port and starboard lights indicate that she is under steam. Harry Astley, designer and builder constructed the ship in his spare time—spread over five days—and is planning to enter a scale model of the New Canadian Pacific Hotel, in Toronto, the Royal York, at next exhibition in London. He already holds two cups as the prize decorator in sugar at the annual competitions held by the American Hotelman's Association, in New York. These entitle him to the title American Champion—which is absurd, because Harry, like Candaian Pacific sailors whether they are on the bridge or in the bakery, is from Liverpool.

Proved His Intelligence

Dog Did Not Take Second Chance Of Missing His Lunch

A great many stories, the majority of them fiction, have appeared in print in newspapers, magazines and other periodicals describing the intelligence and adventures of different breeds of the dog family.

But in Regina there is at least one Scotch collie who—apparently possesses more brains than the average canine.

This particular collie who goes by the name of "Chum," is in the habit of following his master to the office in the morning. He then makes himself comfortable until the lunch hour and rides home on the fender of the family car which calls at noon each day.

It so happened one day that the family car did not call at the noon hour. However, a friend drove with his car and drove "Chum's" master home. Mr. Chum refused point blank to ride on the fender of the strange car and as a result, was forced to go without his lunch, preferring to stay at the office rather than to trudge twelve or thirteen blocks home.

The next morning at the usual hour Chum was waiting for his master to appear. Noticing before leaving, the dog was seen dashing around to the back door of the house. In a few seconds he was re-appeared with a large bone which he carried all the way to the office. Upon arrival there he carefully cached the bone under the steps leading to the office and then settled down for—the rest of the morning. He apparently was not taking any chances of going without his lunch that day, the occasion so had carried his lunch with him.

The Small Town Paper

Has a Real Service To Perform In Developing a Sense Of National Unity

No country in the world for its size is served as well by its newspapers as Canada, Senator W. A. Buchanan, proprietor of the Lethbridge Herald, stated in an address before a gathering of undergraduates in the University of Toronto, of the Toronto chapter of the Sigma Delta Chi, journalistic fraternity. Senator Buchanan in the course of his lecture on "thirty years in journalism," said that even the small town papers, through the highly developed system of news services and the wire of Canadian Press, were able to give their readers as complete an account of the world happenings of the day as any of their larger contemporaries.

The speaker urged his listeners, as future newspapermen, to acquire a knowledge of the history and geography of their own country, to avoid sectional and racial prejudices and above all to be fair and accurate, that they might be in a position to lend and build up their country.

The greatest responsibility of the newspaper was emphasized by the speaker when he pointed out that the daily or weekly was the only one percentage of the population was its only reading matter. The duty of the newspaper was to educate all its readers particularly those coming to the country, along the lines of national unity and breadth of outlook.

An interesting feature of the meeting was the fact that the chairman of the meeting who introduced the speaker was Senator Buchanan's son, who is attending the university and is himself an embryo journalist.

His Own Pledge

Murphy was a sore trial to the village priest. The consumption of whisky he drunk was something appalling. "If you don't sign the pledge, Murphy," said his reverence in the course of a long warning conversation, "you will become like the man who was so full of whisky that when he fell down and broke his breath caught fire, and he died!"

"I'll take the pledge, Father," answered the delinquent. "I will, I promise never to blow out a candle again!"

First Advertised Ice Cream

The first ice cream advertisement in history appeared in the New York Gazette, on May 19, 1777, it has been established through research work by the New England Association of Ice Cream Manufacturers. Inserted by one Philip Lenzi, styling himself "a confectioner from London," the advertisement stated that the new delicacy might be had at his shop "almost every day."

Retrospective

Mrs. Jones—"Why, Mrs. Smith, I thought you were dead!"

Mrs. Smith—"No, I'm not dead, but I've been very ill."

Mrs. Jones—"Oh, I'm so glad you're not dead!"

Tradesmen Are Courteous

Traders Can For Coffee

The proprietor of a cafe at Roverto, Italy, informed a motorist customer that he admired his little car, and would be glad if he bought there and then cash down. He had not the money on him, however, and the banks were closed. "Very well," the proprietor said, "instead of cash, I'll take, payable on demand, cups of coffee. Ten thousand of them!" The bargain was struck.

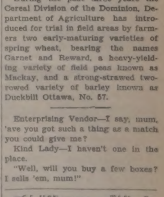
New Cereal Introductions

During the past three years the Dominion Experimental Farms Department of Agriculture has introduced for trial in field areas by farmers two early-maturing varieties of spring wheat, named Ruby, Garnet and Reward, a heavy-yielding variety of field peas known as Mackay, and a strong-strawed two-rowed variety of barley known as Duckbill Ottawa, No. 57.

Enterprising Vendor—I say, mum, 'ave you got such a thing as a match you could give me?

Kind Lady—I haven't one in the place.

"Well, will you buy a few boxes? I sells 'em, mum!"



"This is a real Velazquez."

"How do you know?"

"By the bill."—Buen Humor, Madrid.

Place Of Wheat In The Diet

Per Capita Consumption Appears To Be Increasing the World Over

Wheat now contributes one-fourth of the calories of the American diet. According to the Food Research Institute, of Stanford University, California it is still the outstanding single staple foodstuff. In most southern European countries, wheat contributes a larger proportion of the total calories of the diet than in the United States; but in countries where rye or rice is the staple cereal, its contribution is smaller. Its nutritional importance in the United States lies primarily in the starch content, not in the content of protein, mineral elements, vitamins, or roughage.

To consume wheat as whole wheat bread instead of white bread would make no essential contribution to the national health, and would not be in the interest of national economy at least so long as the present American diet continues to prevail. Protein, minerals, vitamins, and roughage are adequately available in other foodstuffs and need not be sought in whole wheat bread. Nutritional security in the diet is rather to be sought in the milk supply; and perhaps it appear that the value of the milk supply is secured from milk offals of wheat. Removal of the supply of mill offals, with attendant shifts of feed-crop production acreage appear advantageous. Only in such countries as India and China, where the diet is little varied, are nutritional or economic advantages to be secured by consuming whole grains rather than highly milled grains.

Wheat now ranks as one of the cheapest foods. Per capita consumption appears to be increasing in the world at large, but not in the United States or in Great Britain, Canada, and Australasia. Under present conditions there is little reason to anticipate increased per capita consumption here, despite appeals on behalf of producers.

Bee-Keeping In the Peace River District

Fair Success Attends Recent Experiments Carried Out

Bee-keeping is being given a trial at the Beaverlodge Experimental Sub-station, in the Peace River District. With proper care the bees will winter in good condition, but provision has to be made against spring dwindling, owing to protracted cold weather and a lack of early pollar yielding plants. Packages of two pounds each were imported in the spring from Alsike. These were hived on drawn foundation and did moderately well. The colonies thus obtained, along with those wintered at the station, were increased during the season for extracted honey.

According to the superintendent in his report for 1927, the yield of honey amounted to 108 pounds per colony. The largest single colony, which began the season with a two-pound package shipped in from the south, yielded 226 pounds for the season. The season of highest yield was in the month of August, when in one twenty-four hour period 12.5 pounds of honey were gathered by a single colony, a thing not likely to occur sweet clover bloom which was the main honey crop at the station.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained 100 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

THE CRIMSON WEST

BY

ALEC PHILLIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER XVI.—Continued.

From up the mountainside came a drumming roar and the rending crash of trees as the fire undermined their roots. Sparks from burning tree-tops crossed the fire-break and started other fires. To combat these, water had to be carried up the steep hillside in pails. Andy was among those delegated to this arduous task. For hours they moved from stream to hill and back again with a brimming pail in either hand. Scorched by sun and fire, the perspiration streaming down his face and stinging his eyes, the little hero stuck gamely to his task.

"I tired on this 'ere job as a cook," he grumbled, "but I'm a blakin' waiter-spout. Strike me pink, if the water I've carried today was sprinkled in 'all the fires I've put out a job. Oh, well," he added resignedly as he filled his pails and turned to again ascend the hill, "as Methuselam said, 'Every little bit s'pat'."

Two buckets myke exactly four million, two 'undred and six gallons that I've carried in this day!" At this instant his foot caught in a root to send him sprawling on his face rolling down the mossy hillside, the pails clattering after. He lay where he had fallen, flat on his back, with arms outstretched. "There," he soliloquized, "that was the work of straw that I broke the elephant's back. To 'ell with the fire. Let the blighter burn."

Wilkinson came wearily down the hill. His face blackened and blistered, his hat gone, and his shirt a network from holes burned through the contact with the sparks. He sprawled on all fours by the stream, drank sparingly, then plunged his face in the cooling waters.

"Hullo, boy!" shouted Andy, "d'ow would you like to 'ave a cold bottle of beer?"

Wilkinson seized a stone threateningly and hurled it at his tormentor. "Men have been killed for less," he growled huskily.

"I sy, Willie," grinned Andy, "those Forestry jobs are a snap. Do you 'ave the nerve to collect a salary?"

The district ranger was too tired for speech. His swollen face puckered in a smile and he passed on up the hill on his way to camp stiffly as his feet and remained his never-ending task.

Connie brought reports that the fire was being held on the north and east. The fire-break on the south held, but spot fires were kept in check only by the almost superhuman efforts of the fire-fighters.

Forest fires reach the peak of their intensity while the sun is hottest. With darkness the wind subsides, and, especially in the mountains the heavy dews are a never-failing help.

The sun, showing blood-red through the smoke, now took behind the hills and a blessed coolness filled the air. The fire smouldered along the fire-breaks, but the dreaded sparks were not flying. The trembling roar diminished to a steady crackling where fallen trees were being steadily consumed.

The fire-fighters, their shoulders drooping, and wavering from sheer weakness plodded down the hill for well-earned food and rest.

"You'll have to be at it again at daylight," said Wilkinson grimly. They nodded a tired assent. Wilkinson and Donald with twelve men patrolled the fire area throughout the night.

The next morning broke sullenly to a dull heat. As the first streaks of light heralded the coming of the new day, the fire-fighters again took up their posts. Men from the other camp arrived, and another day of battle with the fire demon was begun. An attempt was made to check it on the west front, high up the mountainsides, where the fire had crept through in the night to a small level plateau. At ten o'clock the wind came suddenly, and with it the fire broke through on the south-west corner with a deafening roar and rushed through a stand of dead trees with ever-increasing speed.

Donald shouted a quick cry of warning to his men and darted for safety of being cut off by this break. They came on the double quick through the gap, and with a last shout up the hill over the path they had traversed.

"Are the men all out?" questioned Wilkinson.

"Andy isn't here!" said one of the men excitedly.

Donald shouted the speaker's arm. "Was Andy with you?"

"He was."

Donald looked in grim lines. Whirling quickly, he ran straight toward the line of fire. With a bound Connie was on her horse and after him at a swift trot. As he neared the screen of smoke, Pegasus changed his gait to that of a mad runaway. and with the small rider lying prone on his bare back disappeared from view.

At this spot the fire had spent its fury in the first mad rush, but a heavy smoke welled up from the charred ground. Terror possessed the horse, the calm voice of his rider was ures urged him on. Crimson embers showered about her. Scorching heat seared her face as if the breath of a blast furnace had been opened. A blazing branch fell with a rushing sound, barely missing the horse's head. Singed, smoke-blinded, the pair rode made the plucky cayuse shy in a panic of fear.

In his agony apprehension, the crowd of fire-fighters stared with tense anxiety into the drifting smoke. Then a glad cheer burst from them as horse and rider emerged. Andy clinging to Connie's stirrup and Donald swinging drunkenly in the rear. Ready hands held them up. Andy's parched lips and bathed his hot face as he lay panting on the ground. He sat up with an effort and looked around. "Where's Connie? he asked. But Connie had stolen quietly from the scene.

By midnight the main body of the fire was apparently under control, but the persistent spot-fires kept the entire crew engaged. Connie, cottonwood, standing just with in the fire-breaks, was the chief of fender. Sparks from its lofty blazing top were hauled by the wind to land on the dry ground, starting innumerable fires.

"That tree will have to come down or we will be fighting spot fires indefinitely," said Wilkinson.

Silence fell. Everyone of those lumber-jacks knew the danger attached to the falling of a ruffian, blazing tree. In sound timber the skilled "faller" can cut the exact kind drive the falling-wedge to lay the tree within six inches of the desired spot. With a hollow tree the task is much more difficult, as the thin, dry decayed pulp the wedge may not provide sufficient leverage to swing the enormous weight, and the tree may crash from any angle.

Men working at the butt of a burning tree, too, are exposed to the fall of branches. Even a small bough, hurtling from the dizzy height of lordly cottonwood or fir, will break a man's limbs.

Wilkinson picked up a falling saw. "Who will go with me?" he called.

Gillis stepped forward with wedge and hammer.

"Nothin' doin'," said little Blackie. "Wilkinson here has a wife and kid, an' Jack has brains enough to be our boss. Me and Hoop-la ain't got neither, we're just a couple roughnecks. Whadda you say, Hoop-la?"

"Ye betcha," came vigorously from Blackie's pal.

Two men were sent with them to help in clearing a space at the foot of the big stuff. A few minutes later the twang of the cross-cut, mingled with Blackie's happy song, sounded above the crackling of the fire.

Wilkinson pointed to the southern sky, where heavy nimbus clouds were massing. "At last! The blessed rain is coming!" he cried in a voice of thankfulness.

A stronger gust swept through the valley to send a surge of flame from the giant cottonwood's topmost branches. There was a sharp cry from Blackie. As the first streaks of a splinter-crash and came roaring to the ground, sending up a swirl of fiery sparks. Men from the other camp arrived, and another day of battle with the fire demon was begun. An attempt was made to check it on the west front, high up the mountainsides, where the fire had crept through in the night to a small level plateau. At ten o'clock the wind came suddenly, and with it the fire broke through on the south-west corner with a deafening roar and rushed through a stand of dead trees with ever-increasing speed.

Simple Precautions Against FLU Sore Throat — — The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there be any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc. and can be relied upon to give very satisfactory results.

War Graves Commission Is Extending Work

Thousand New Cemeteries Have Been Opened in France and Belgium

That the next war would see the obliteration of whole families and whole communities, worse than the days in Egypt when a great cry went up that the first born of every family had died, was envisaged by Colonel Henry C. Osborne, C.M.G., Honorary Secretary of the War Graves Commission, in a speech at the Empire Club luncheon in Toronto. Colonel Osborne is the representative of Canada on the Commission.

The work of the Imperial War Graves Commission, he stated, is financed by the various countries of the Empire, in proportion to the number of their graves. Great Britain bears about 80 per cent. and the remaining 20 per cent. is divided up among the other countries of the Empire. Canada's share being about 5 per cent.

In France and Belgium, 1,000 new British war cemeteries have been opened, with 200 to 10,000 graves in each, and additional 1200 plots in Paris cemeteries. The work of the commission extends from the Baltic to the Dardanelles, from Antwerp to Jerusalem, across India and China, New Zealand and Australia, and in Canada where there are over 1700 war graves in 1,500 different places.

Colonel Osborne described the cemeteries as beautiful places.

Many sites have been allotted to Canada, he said, in those places where she played her most glorious part in the war. One is marked by a great 15-ton block of Canadian granite. The monument at St. Julien, he said, had been described by the Daily Graphic as "the most splendid, as the finest war memorial he had seen.

The uncompleted monument at Vimy was of imposing proportions 200 feet square and 125 feet high. It had been designed by a prominent Canadian architect, W. S. Allward, and obtained a good deal of statuary. It would shortly be completed.

The war Graves Commission ,the colonel concluded, was a symbolism of Imperial unity; it might well stand as a pattern for other Imperial commissions. He made an exhortation to rejoice in Canada's British heritage and paid tribute to Canada's loyalty, attachment, common loyalty and free co-operation throughout the British Empire.

Made Mysterious Jewels

Drug In Goa Stone Was Secret Known Only To Jesuits

Goa, a settlement on the west coast of Asia, has for centuries been the property of the Portuguese authority after their occupation. The Jesuits appeared and set up a monastery, and it was there that a specific drug was made. This drug, it was known only to the Jesuits made these stones, which have come to be known as Goa stones, from various solidified drugs. The Jesuits worked totally in the dark' as to what drugs they were composed of and how they were made.

Each stone was mounted in a silver filigree case and represented the examples of old workmanship.

When the Jesuits left Goa were troubled with indigestion he had only to scrape off a small portion of his stone, and drink it in a glass of water, and he was quite all right in a few moments.

Goa stones today, however, are very rare and can only to be found in the valuable collections of antiques

Several of these relics of the past were auctioned recently when the London residence of a well-known expert in antiques, Sir Hercules Read, was sold.

Asked to write an essay on Quakers, a little girl wrote: "Quakers are very meek people, who never fight, and never wear swords. My father is a Quaker, but my mother is not."

When people in olden days were run down they took a tonic. Now they take the driver's number.

It is estimated that only 5½ per cent. of Florida's white population is foreign born.

New Guinea Miners Now Using Airplane

Fourteen-Day Trip Inland Takes Only One Hour

Aeroplanes have made gold mining possible in New Guinea, but the extreme climate adds a great deal to the hazard of flying, according to Lieut. Kenneth Frewin, an airman of the Mandated Territories Airways, who has just returned to Sydney, Australia, from the big island.

In less than two years gold worth more than $12,000,000 has been taken out of New Guinea, chiefly because aeroplanes have made the remote regions accessible. The flyers have been compelled to take tremendous risks, according to Frewin.

"The difficulty in New Guinea," he said, "is to obtain a sufficient number of pilots, as the average man can only 'stick it' for from three to six months because of the severe conditions, the prevalence of fever and malaria, and the lack of fresh food.

"Although the distance from the Bulolo gold fields to Salamoa beach was only 40 miles, the journey took nearly a fortnight, because of a barrier of rugged mountains rising from 10,000 to 15,000 feet high," he said.

"The trip to and from the coast was negotiated by native carriers many of them dying on the way. Even the strongest could not make more than a few trips, on each of which they carried a load of about 60 pounds, gold to the coast and provisions to the fields. It was realized that the gold, although plentiful, would not pay under those conditions. Mules were pressed into service but the journey was too rough for them."

The use of aeroplanes had been decided upon and while the first efforts to reach the goldfields were clumsy and only partially successful, aviation has at last been established on a fairly permanent basis, according to Frewin. Aircraft now reduced the journey to the fields from 14 days to one hour. The miners had plenty of money and the pioneer aviators were paid accordingly. The result being that many new companies entered the field. Now several of the gold mining companies operate their own 'planes.

Western Horse Shipments

Twenty-five Thousand Sent To Eastern Canada Last Year

Western horses to the number of 25,000 were shipped from the prairies to Eastern Canada last year. Most of these horses came from Alberta and Saskatchewan, and were disposed of principally in Ontario and Quebec, though some were shipped as far as Prince Edward Island. The shipments varied from heavy draught animals to light range stock and about 5 per cent. were unbroken. A record of these horses was kept, horses of Percheron and Belgian breeds, was shipped into Paisley, Ont., recently and sold at public auction, realizing an average price of $71 for the 21 head.

An armored vest and a breast machine gun, which starts shooting when the wearer raises his hands at the command "hands up," is a new device for bank guards and night watchmen.

Wife (during quarrel)—You're becoming absolutely unbearable. It will soon be impossible to live with you.

Husband (hopefully)—How soon?

Little Helps For This Week

"In God have I put my trust: I will not be afraid."—Psalm lvi. 4.

Oh, heart of mine, we shouldn't Worry so!
What we've missed of calm we couldn't
Have, you know!
What we've met of stormy pain,
And of sorrow's driving rain,
We can better meet again,
If it blow.
We have erred in that dark hour
When our tears fell with the shower
All alone.
Were not shine and shadow blent,
As the gracious Master meant?
Let us temper our content
With His own.
For we know not every morrow
Can be sad;
So, forgetting all the sorrow
We have had,
Let us fold away our fears,
And put by our foolish tears,
And through all the coming years
Just be glad.
—James Whitcomb Reilly.

God writes straight on crooked lines.—Spanish Proverb.

Education By Mail

B.C. Rural Correspondence Courses Cost $13 a Pupil

Rural correspondence school courses in British Columbia, cost $13 a pupil, while the ordinary public school student costs the province $70, according to information tabled before the public accounts committee of the Legislature.

The committee was informed that 250 pupils in outlying parts of the province obtained their entire school education by means of the correspondence classes.

Whales have the largest brains of all mammals, the largest on record weighing 7,000 grams.

Use Minard's Liniment for the Flu.

In 1906 Santos-Dumont, a Brazilian living in Paris, remained in the air 21 seconds flying a biplane of his own construction.

Canada's Census Population

Last Registration Gave Total Number As 50,706

According to reports tabled in the House of Commons, three Chinese immigrants were admitted to Canada during the fiscal year 1927-28, two of whom were women. Two students coming to attend Canadian universities were admitted as non-immigrants. Eleven Chinese were deported during the year.

The registration carried on during 1923-24 showes a Chinese population in Canada of approximately 50,706. Of this number, 44,305 were males, 1,302 females, and 6,099 children under 18 years of age. Of the total British Columbia had 31,116 Chinese residents.

The number of Japanese entering Canada in 1927 was 511, and in 1928, 328. Of the total for two years, 273 were adult males, 257 adult females, and 216 children under 18 years of age.

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for nerves and

the trouble and I must say I felt different after the first dose. I have been told this last 2 months that I look twenty-five, although I am now forty-seven and have seven children. I have taken the Vegetable Compound regularly for some time and sleep well, can only feel young."—Mrs. McKee, 18 Laurier Ave., Toronto, Ontario.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

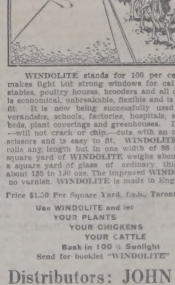
COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, in most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.



WINDOLITE stands for 100 per cent. sunlight. It makes light Let strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is so economical, unbreakable and easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold —will not crack or chip,—cuts with an ordinary pair of scissors and is very flexible. WINDOLITE is supplied in rolls ang length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs. while a square yard of glass of ordinary thickness, weighs about 1lb to 1.40 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.20 Per Square Yard, f.o.b. Toronto.

BEAUTIFY YOUR TOWN

The present is an appropriate time when thought and effort should be directed to the aiding of nature by planting trees, flowers and shrubs. Just a little effort and care on the part of the citizens of Delia, in the planting and culture of such ornaments and adornments, will certainly bring joy and satisfaction.

It is manifestly unfair to ourselves, and more particulary to those of the future, to fail to do that which will make this town more attractive. Nature is entitled to help from mankind

Make your place so attractive that home shall be all that is desired and the town so beautiful to the visitor that he can truthfully say that nature and man have united in a wonderful work. There is no easier and better way to accomplish this than direct individual effort in the propagation of trees, flowers and shrubs.

ADVERTISING AIDS ALL

Newspaper advertising and the automobile have combined to bring the city shop to the very door of the farm house and the suburban home. Each week the newspapers bring a complete quotation of goods to be bought, where it can be purchased and the prices asked. The sale is actually made through the advertising column of the newspaper. A visit to the store next day by automobile completes the advantage of money for merchandise.

How much more convenient is this contrivance of modern commercial and industrial genius to the inefficient method of our rural forebears who knew only their personal needs. With them there was no alternative for the slow, tedious and disappointing expedient of going to town by wagon or cart and trusting to diligence and a stout pair of shoes to seek out the shop which sold that which they were in need of and which sold it at an acceptable price, if not at the lowest obtainable price.

Many New School Districts Organized

Fifty new school districts were organized in Alberta during 1928, bringing the total number of districts in the province up to 3,497. The enrolment of pupils during the year shows a gain of 4,706 and the total enrolment is now approximately 160,000. Eighty-one new one room schools and thirteen new two-room schools were built in country and village districts.

An outstanding feature of the report of the Department of Education is the marked increase in the number of students enrolment for technical education, enrolment in the Institute of Technology at Calgary having reached a total of 1,745. Approximately 500 new students were enrolled during the year for correspondence courses. Over 1,000 more pupils wrote the departmental examinations than in any previous year. In the high school grades, their success is shown by the fact that of all the units written 75.19 per cent. were passed successfully.

Local and District

Dr. Netherton and Geo Martin motored to Calgary last Sunday

* * *

Since the fire Geo. Bolster has started building a new barn.

* * *

Wm. McPherson ("Shorty"), and two daughters, May and Dora, were visitors to Calgary last week.

* * *

F. Anderson has now moved into the residence he recently purchased from A. F. Cobb.

* * *

E. Cowitz, of Didsbury, has taken a position in F. Anderson's hardware store.

* * *

Bert Dawson and family have moved into the residence occupied by F. Anderson.

* * *

F. J. Stewart, manager of the Bank of Commerce, was a visitor in Calgary last week.

* * *

J. J. Bradford shipped a carload of mixed stock to Calgary on Tuesday.

* * *

Report of the United Church anniversary services, and some other items, are unavoidably held over until next week.

* * *

There has been beautiful spring-like weather during the past week, with bright sunshine. What is now needed is some moisture.

* * *

Miss Helen Smith, of the teaching staff of the public school, has been indisposed a couple of days this week.

* * *

Mrs. Claire Bryan and little daughter Meiba who were wintering in the East, returned on Monday, March 11th.

* * *

Remember the U.F.W.A. dance in Schatz's Hall, tomorrow (Friday) night. There will be a five-piece orchestra, and a good time is assured for everyone.

* * *

The manager of the Farmers' Store is occupying the residence, formerly in possession of J. Q. Lane, on corner of Main St. and Third Ave., owned by J. F. Crosweller.

* * *

Rev. G. Steele exchanged pulpits with Rev. H. D. Leitch, of Brumheller, Sunday the 17th. His subject at the evening service was, "St. Patrick and his contribution to the growth of Christianity in Ireland."

* * *

Attention is drawn to advt. in an other column of John Kissick's sale, 7 miles south and 3½ west of Delia, of 13 head of horses, 9 cattle, machinery, household goods, harness. It is dated for Monday next, March 25. W. C. King is the auctioneer.

* * *

Walter Marchant arrived home from the states on Saturday morning, where he had been taking treatment. He is now feeling fit and well, everyone will be pleased to hear, and has started work in the Delia Bakery, now owned by Messrs Clark & Anderson.

* * *

A two-bed private hospital for general and maternity cases, will be opened on Second Ave., Delia, in charge of Miss E. C. Bigelow, registered nurse, graduate of Vancouver General Hospital Training School for Nurses. Patients will be received on and after April 2nd. —Advt.

* * *

Charlie Sweeney sold his farm on Tuesday morning to Geo. Golds, of the Hand Hills, at a price approximating 35 dollars per acre. The farm is situated about five miles north of Delia, and contains a half section of choice, clean, well cultivated land which Mr. Sweeney homesteaded and has farmed during the past nineteen years He received a substantial cash first payment.

* * *

"But God commendeth His love to us while we are yet sinners. Christ died for us." Rom. 5. 8 And He died for all, that they which live should not henceforth live unto themselves, but unto Him which died for them, and rose again." 2 Cor. 5. 15. If this is true, and it certainly is, why are you not living unto Him? In other words, why are you not living for His glory? Are you afraid of what others might say of you, or do you prefer the lower level?

THE REFUGE OF PRAYER

I have been driven many times to my knees by the overwhelming conviction that I had nowhere to go.—President Lincoln.

Ford

Here Are The Facts
Read Them!

Many people buy without investigation of facts, and on snap or emotional judgment. Every year it is estimated a million car buyers change their ideas on their car after they have had it six months. Consider the following facts before purchasing your next car—and then decide for yourself which car offers the most value for the money.

1. Do you know that no car under $2,000 outside of Ford is putting on Houdaille Double Acting Hydraulic Shock Absorbers as standard equipment?
2. That no car under $1,500 except Ford has triplex shatter-proof windshield glass as standard equipment?
3. That Ford is the only car under Buick with three quarter floating axle.
4. That Ford is the only car under Buick with Torque tube and Radius drive construction.
5. Ford is the only car under $1,500 with five-bearing transmission.
6. That the new Ford has 25 roller and ball bearings in its chassis.
7. Ford is the only car under $1,500 with three-quarter irreversible steering gear.
8. That Ford and Lincoln are the only cars built today that have five one-piece steel wheels as standard equipment.
9. That Ford is the only car under highest priced cars with silent six-brake, internal expanding all enclosed system.
10. That wrist pins in motor are machined to .0002 and are of full floating type.
11. That aluminum alloy pistons are balanced to an accuracy of two grains. This is the finest balanced of any piston in any car regardless of cost.
12. That when the car is travelling 50 miles an hour—the revolutions per minute of the motor is only 2053.
13. That the gear ratio of the New Ford is 3.7.
14. That the actual road clearance of the New Ford is 9½ inches—highest of any American stock cars.
15. That New Ford has proven itself in public hands this past year as one of the finest performing cars ever built—from standpoint of pick up, hill climbing ability, speed and riding comfort.
16. That the New Ford car has proven itself beyond any doubt as the most wonderful winter car ever built. It starts surely in cold weather and bucks snow beyond belief—ask the owners.
17. That service and dealer responsibility behind the New Ford is unequalled by that of any other car built.
18. That the New Ford holds the road at high speeds as good as cars being sold at highest prices.
18. That the braking system of the New Ford is now standard Lincoln equipment.
20. That in actual competition in England against all comers, the New Ford took first and second place.
21. That the New Ford won first and second place in competition with all comers in Germany.
22. That the New Ford motor, when tested on the road at 35 miles per hour, turns over 1038 R.P.M.
23. That there are 690 electric welded operations on the New Fords.
24. That 90% of all steel parts are forgings.
25. That the upholstery material of the New Ford is 90% wool.
26. Lastly—That the New Ford stands out supreme in its field—in mechanical design, specifications, equipment, quality, and precision workmanship.

Provincial Horticultural Association Formed

Those interested in the beautification of the province will be interested in the announcement of the recent formation of the Alberta Horticultural Association. The new organization is the outgrowth of a concerted movement on the part of the Alberta Fairs Association and of twelve horticultural societies in various parts of the province. Its main purpose is to encourage urban and rural citizens to make the homes and home surroundings in Alberta more attractive by the growing of trees, shrubs and flowers. The Association is interested in assisting in the formation of additional horticultural societies in the province and will furnish information at any time to societies or to individuals on horticultural problems. Considerable assistance will be given to the organization by H. L. Seymour, Provincial Director of Town Planning.

The organization will be directed by the following officers:—Hon. President, Hon. George Hoadley, Minister of Agriculture; Hon. Vice-President, V. E. Forster, Camrose; President, C. A. Hayden, Calgary; Vice-President, E. V. Kerr, Camrose; 2nd Vice President, G. Glaser, Lethbridge; Secretary-Treasurer, E. P. Williams, Edmonton. Directors H. Huxley, Claydminster; H. Gilchrist, Red Deer.

—oo—

Card of Thanks

I wish to take this opportunity to thank the ratepayers of Ward 2 in Lambton Municipality for their confidence and support in the recent election I will endeavor to conduct the business in a manner that will justify my election.

S. H. Martin

Local Agent

Sugar Beet Crop Valuable

The value of Alberta sugar beet crop in 1928 is placed at $241,900 according to figures compiled by the Department of Agriculture. Some 5,300 acres of beets were harvested yielding an average of 7.22 tons per acre, which will bring growers an estimate return of $7 75 per ton. Officials of the Canadian Sugar Factories Limited report a steadily growing interest in this industry in the southern part of the province and predict that the acreage planted in 1929 will considerably exceed that of last year.

—oo—

TRY THE DELIA TIMES

Good Prices Paid for Irrigation Lands.

Very satisfactory returns were received for 30 parcels of irrigation land disposed of by auction at Taber on Saturday last. The record price of the sale was $96 per acre paid by N. Jensen for a parcel of land in the vicinity of Barnwell.

Dr. H. M. Tory Honoured

Dr. H. M. Tory, who occupied the position of president of the University of Alberta from its organization until last year has recently been appointed president of the League of Nations Society of Canada, succeeding Sir George Foster.
